

Subject card

Subject name and code		Fundamentals of Physics, PG_00047650						
Field of study		Informatics						
Date of commencement of studies		October 2023	Academic year of realisation of subject			2023/2024		
Education level		first-cycle studies	Subject group			Obligatory subject group in the field of study Subject group related to scientific research in the field of study		
Mode of study		Full-time studies	Mode of delivery			blended-learning		
Year of study		1	Language of instruction			Polish		
Semester of study		2	ECTS credits			3.0		
Learning profile		general academic profile	Assessment form			exam		
Conducting unit		Katedra Fizyki Atomowej, Molekularnej i Optycznej -> Faculty of Applied Physics and Mathematics						
Name and surname of lecturer (lecturers)		Subject supervisor		dr inż. Patrycja Stefańska-Ptaszek				
		Teachers		dr hab. inż. Maciej Demianowicz dr Maciej Kuna dr inż. Patrycja Stefańska-Ptaszek dr inż. Ewa Erdmann				
Lesson types and methods of instruction		Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
		Number of study hours	30.0	15.0	0.0	0.0	0.0	45
		E-learning hours included: 4.0						
Learning activity and number of study hours		Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours		Self-study		SUM
		Number of study hours	45	3.0		27.0		75
Subject objectives		Providing the student with the basic knowledge of physics helpful in further education.						
Learning outcomes		Course outcome	Subject outcome			Method of verification		
		[K6_U02] can perform tasks related to the field of study in an innovative way as well as solve complex and nontypical problems, applying knowledge of physics, in changing and not fully predictable conditions	Student has the ability to solve simple problems of classical mechanics, statistical physics and thermodynamics, oscillatory and wave motion, and of the wave nature of light.			[SU4] Assessment of ability to use methods and tools [SU1] Assessment of task fulfilment		
		[K6_U05] can plan and conduct experiments related to the field of study, including computer simulations and measurements; interpret obtained results and draw conclusions	Student has the ability to analyze physical systems and investigate their properties, plan and conduct simple physical experiments.			[SU4] Assessment of ability to use methods and tools [SU3] Assessment of ability to use knowledge gained from the subject [SU1] Assessment of task fulfilment		
		[K6_W02] knows and understands, to an advanced extent, selected laws of physics and physical phenomena as well as methods and theories explaining the complex relationships between them, constituting the basic general knowledge in the field of technical sciences related to the field of study	Student has the ability to recognize and explain basic and complex phenomena, concepts and laws concerning the basics of physics and modern physics.			[SW1] Assessment of factual knowledge		

Subject contents	<p>LECTURE</p> <p>Kinematics and dynamics of a material point. Principle of conservation of energy. Principle of conservation of momentum and angular momentum. Mechanics of rigid body. Basic properties of gravitational field. Heat, work, internal energy, gas transformations. Laws of thermodynamics. Elements of kinetic theory of gases. Maxwell-Boltzmann distributions. Entropy, reversible and non-reversible processes. Harmonic oscillator, addition of oscillations. Elastic waves. Basic properties of acoustic waves. Energy density and intensity of wave. Parameters of the medium, wave impedance. Elements of geometrical optics. Wave optics: light as electromagnetic wave, dispersion, interference, diffraction, and polarization of waves. Basics of holography. Electric field intensity. Electric field of a point-like charge and of a system of charges. Electric potential of a point-like charge and of a system of charges. Relationship between the intensity of electric field and electric potential. Gauss' theorem. Electric dipole.</p> <p>PRACTICE</p> <p>Problems on kinematics of progressive motion, description of the motion in Cartesian system. Velocity, acceleration, normal and tangential acceleration. Problems on kinematics of rotational motion, description of the motion in Cartesian system and in a polar coordinate system. Problems on dynamics of progressive motion, applications of Newton's laws. Dynamics laws in non-inertial frame of reference. Problems on conservation of energy, momentum and angular momentum. Problems related to the first law of thermodynamics in the case of an ideal gas. Problems related to Maxwell distribution. Calculation of entropy changes in reversible transformations of an ideal gas. Examples of harmonic motion. Basics of wave motion. Wave energy density, Poyntings vector, wave intensity. Problems related to the interference of light. Diffraction and polarization of light. Fraunhofer single slit diffraction. Malus's law.</p>											
Prerequisites and co-requisites												
Assessment methods and criteria	<table border="1"> <thead> <tr> <th data-bbox="456 949 794 978">Subject passing criteria</th> <th data-bbox="799 949 1137 978">Passing threshold</th> <th data-bbox="1142 949 1481 978">Percentage of the final grade</th> </tr> </thead> <tbody> <tr> <td data-bbox="456 985 794 1014">Exam.</td> <td data-bbox="799 985 1137 1014">50.0%</td> <td data-bbox="1142 985 1481 1014">67.0%</td> </tr> <tr> <td data-bbox="456 1021 794 1050">Solving the problems.</td> <td data-bbox="799 1021 1137 1050">50.0%</td> <td data-bbox="1142 1021 1481 1050">33.0%</td> </tr> </tbody> </table>			Subject passing criteria	Passing threshold	Percentage of the final grade	Exam.	50.0%	67.0%	Solving the problems.	50.0%	33.0%
Subject passing criteria	Passing threshold	Percentage of the final grade										
Exam.	50.0%	67.0%										
Solving the problems.	50.0%	33.0%
