

## Subject card

|   |   |  |          |                                     |  |            |     |
|---|---|--|----------|-------------------------------------|--|------------|-----|
| Subject name and code   | Physics of materials, PG_00052027   |  |          |                                     |  |            |     |
| Field of study  | Nanotechnology  |  |          |                                     |  |            |     |
| Date of commencement of studies   | October 2023  | Academic year of realisation of subject                    |          |                                     | 2023/2024  |            |     |
| Education level   | second-cycle studies  | Subject group  |          |                                     | Optional subject group<br>Subject group related to scientific research in the field of study |            |     |
| Mode of study   | Full-time studies   | Mode of delivery   |          |                                     | at the university  |            |     |
| Year of study   | 1   | Language of instruction                                    |          |                                     | English  |            |     |
| Semester of study   | 1   | ECTS credits   |          |                                     | 8.0  |            |     |
| Learning profile  | general academic profile  | Assessment form  |          |                                     | exam   |            |     |
| Conducting unit   | Department of Solid State Physics -> Faculty of Applied Physics and Mathematics |  |          |                                     |  |            |     |
| Name and surname of lecturer (lecturers)  | Subject supervisor  | dr inż. Tadeusz Miruszewski                                |          |                                     |  |            |     |
|   | Teachers  | dr inż. Tadeusz Miruszewski<br>dr inż. Sebastian Wachowski |          |                                     |  |            |     |
| Lesson types and methods of instruction   | Lesson type   | Lecture  | Tutorial | Laboratory                          | Project  | Seminar    | SUM |
|   | Number of study hours   | 30.0   | 30.0     | 30.0                                | 0.0  | 0.0        | 90  |
|   | E-learning hours included: 0.0  |  |          |                                     |  |            |     |
| Additional information:<br>E-Learning course: <a href="https://enauczanie.pg.edu.pl/moodle/course/view.php?id=33132">https://enauczanie.pg.edu.pl/moodle/course/view.php?id=33132</a> |   |  |          |                                     |  |            |     |
| Learning activity and number of study hours   | Learning activity   | Participation in didactic classes included in study plan   |          | Participation in consultation hours |  | Self-study | SUM |
|   | Number of study hours   | 90   |          | 5.0                                 |  | 105.0      | 200 |
| Subject objectives  | Gaining knowledge of the fundamentals of physics of materials                   |  |          |                                     |  |            |     |

|                                 |  |  |  |
|---------------------------------|--|--|--|
| Learning outcomes               | Course outcome   | Subject outcome  | Method of verification   |
|                                 | K7_W01   | The student has extensive and well-ordered knowledge of materials science.   | [SW1] Assessment of factual knowledge                                |
|                                 | K7_K03   | The student is able to cooperate and work as part of a group, in a variety of roles. The student can make a meaningful assessment of their performance and the performance of others.  | [SK1] Assessment of group work skills                                |
|                                 | K7_W09   | The student has extensive knowledge of English terminology in the field of physics and mathematics, as well as chemistry, computer science, technology   | [SW3] Assessment of knowledge contained in written work and projects |
|                                 | K7_W06   | The student has extensive knowledge of methodology of working in a physics laboratory, supported by experience in laboratory work. He knows the principles of health and safety to a degree that enables working independently in a research laboratory. | [SW3] Assessment of knowledge contained in written work and projects |
|                                 | K7_W03   | The student has a general knowledge of current trends and the latest discoveries in physics, chemistry, technology and applications of nanostructures.   | [SW1] Assessment of factual knowledge                                |
| K7_U02                          | The student has theoretical and practical skills in laboratory work  | [SU1] Assessment of task fulfilment  |  |
| Subject contents                | <p>Introduction: phases of matter; solid, liquid, and gas; main groups of materials; crystalline and amorphous materials.</p> <p>Fundamentals of crystallography: Bravais lattices and crystal systems; crystal symmetry; Miller indices; reciprocal lattice; primitive and non-primitive unit cells; coordination number; packing fraction; examples of crystals</p> <p>Defects: intrinsic and extrinsic defects; defects in ionic crystals; relations between defects and properties of solids.</p> <p>Atom vibrations and thermal properties of materials: dispersion relations; conception of phonon; Petit-Dulong, Einstein and Debye models of solids; anharmonic effects.</p> <p>Electronic properties of materials: free electron model, boundary conditions, density of states; electron in periodic potential, Bloch theorem; nearly free electrons; tightly bound electrons; holes and electrons, effective mass.</p> <p>Classification of solids: band structures and Fermi Surface; metals, semiconductors and insulators;</p> <p>Properties of semiconductors: intrinsic and extrinsic semiconductors;</p> <p>Transport properties: mechanisms of electron scattering; electrical conductivity and mobility; Superconductivity: main properties of superconductors; phenomenological description of superconducting state.</p> |  |  |
| Prerequisites and co-requisites | basics of math   |  |  |
| Assessment methods and criteria | Subject passing criteria   | Passing threshold  | Percentage of the final grade  |
|                                 | test   | 51.0%  | 50.0%  |
|                                 | obecność, wejściówki, sprawozdania   | 51.0%  | 20.0%  |
|                                 | obecność, kolokwia   | 51.0%  | 30.0%  |
