Example issues/ example questions/ tasks being completed	The EKOPARTNER company is a small company that produces Exclusive organic rodent food sold in 10 kg packages, asked a price management specialist for consultation. So far, the company's pricing decisions have been based solely on cost methods. Using the cost plus method, the EKOPARTNER company set the price for a package of its product at PLN 185 and achieved an average monthly sale of 72 packages of Exclusive pet food. Fixed costs borne by the company are at the level of PLN 2,500 and the variable costs for the achieved sales amount to PLN 4,665.6.Determine the profit mark-up (mark-up rate on costs [%]) used so far by EKOPARTNER). [note that EKOPARTNER is a production company and takes into account all costs in the price calculation]. What margin has the company achieved by using this pricing method?
