

Subject card

Subject name and code	FINANCIAL AND INSURANCE MATHEMATICS, PG_00058552									
Field of study	Economic Analytics									
Date of commencement of studies	October 2023	Academic year of realisation of subject		2023/2024						
Education level	first-cycle studies	Subject group		Obligatory subject group in the field of study Subject group related to scientific research in the field of study						
Mode of study	Part-time studies (on-line)	Mode of delivery		blended-learning						
Year of study	1	Language of instruction		Polish						
Semester of study	2	ECTS credits		4.0						
Learning profile	general academic profile	Assessment form		assessment						
Conducting unit	Department of Economic Analysis and Finance -> Faculty of Management and Economics									
Name and surname of lecturer (lecturers)	Subject supervisor		dr inż. Ewa Mazurek-Krasodomska							
	Teachers		dr inż. Ewa Mazurek-Krasodomska							
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM			
	Number of study hours	8.0	16.0	0.0	0.0	0.0	24			
E-learning hours included: 18.0										
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM			
	Number of study hours	24	10.0		66.0	100				
Subject objectives	Identifies mathematical concepts and tools used in finance, banking and insurance									
Learning outcomes	Course outcome		Subject outcome			Method of verification				
	[K6_W02] demonstrates comprehensive preparation in the field of methods, techniques for formulating and solving problems		selects appropriate methods and mathematical techniques to analyse financial problems			[SU1] Assessment of factual knowledge				
	[K6_U04] formulates logical solutions to complex or unstructured problems		analyzes the influence of various factors which influence the studied phenomenon, striving to obtain an optimal solution			[SU2] Assessment of ability to analyse information				
Subject contents	Time value of money - introduction. Simple interest model (SIM), Capital Gains Tax. Compound interest model (CIM) with annual, sub-period and continuous capitalization. The calculation of the mathematical and commercial discount. Valuation of short-term securities. Real capital value, real interest rate. Annuities - without capitalization, with capitalization, equal, compatible and non-compatible. Valuation of long-term securities. Construction of the loan repayment schedule, APRC calculation. Property insurance - calculation of net and gross premium. Calculation of single and multiple premiums in life, endowment and mixed insurance.									
Prerequisites and co-requisites										
Assessment methods and criteria	Subject passing criteria		Passing threshold		Percentage of the final grade					
	Test and activity in the class		60.0%		70.0%					
	Final test		50.0%		30.0%
