

关。GDAŃSK UNIVERSITY 创 OF TECHNOLOGY

Subject card

Subject name and code	MATHEMATICS 1, P	G_00058542							
Field of study	Economic Analytics								
Date of commencement of studies	October 2023		Academic year of realisation of subject			2023/2024			
Education level	first-cycle studies		Subject group			Obligatory subject group in the field of study			
Mode of study	Part-time studies (on-line)		Mode of delivery			blended-learning			
Year of study	1		Language of instruction			Polish			
Semester of study	1		ECTS credits			5.0			
Learning profile	general academic profile		Assessmer	Assessment form			exam		
Conducting unit	Mathematics Center	-> Vice-Rector	for Education						
Name and surname	Subject supervisor		dr Stanisław Domachowski						
of lecturer (lecturers)	Teachers		dr Lech Kujawski						
			dr Stanisław Domachowski						
Lesson types and methods	Lesson type	Lecture	Tutorial	Laboratory	Projec	ct Seminar		SUM	
of instruction	Number of study hours	16.0	16.0	0.0	0.0		0.0	32	
	E-learning hours inclu	uded: 24.0							
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in stu- plan		Participation in consultation hours		Self-study St		SUM	
	Number of study hours	32		10.0		83.0		125	
Subject objectives	Uses the apparatus concurring in social sci		a and mathema	itical analysis to	o solve	theoreti	cal and praction	cal problems	
Learning outcomes	Course outcome		Subject outcome		Method of verification				
	[K6_U04] formulates logical solutions to complex or unstructured problems		integrates the information obtained from solving complex problems, interpreting them, drawing conclusions and formulating and justifying opinions		[SU2] Assessment of ability to analyse information [SU3] Assessment of ability to use knowledge gained from the subject [SU4] Assessment of ability to use methods and tools				
	[K6_W02] demonstrates comprehensive preparation in the field of methods, techniques for formulating and solving problems		uses a mathematical apparatus to solve economic problems, combining knowledge of mathematics with knowledge of social sciences			[SW1] Assessment of factual knowledge [SW2] Assessment of knowledge contained in presentation			

Subject contents	Functions of one variable and the	ir properties: The absolute value function	on definition, solving equations and				
	inequalities with absolute value, g	e. Power functions solving power and					
	polynomial equations and inequalities. Rational functions solving rational equations and inequalities.						
	Exponential function properties and graphs, solving exponential equations and inequalities. Logarithmic						
	functions properties and graphs, solving logarithmic equations and inequalities. Trigonometric and						
	cyclometric functions properties and graphs, solving trigonometric equations and inequalities. Limits and						
	continuity: Infinite sequences. Fundamental definitions of limit of sequence, convergence and divergence,						
	limit theorems. Applications to solving equations . Differential calculus of functions with one variable and						
	applications of differential calculus of functions with one variable. Higher derivatives and differentials.						
	Monotonicity and local extrema. Convexity, concavity and inflexion points of a function. De IHospitals						
	Theorem. Asymptotes. Applying differential calculus to studying the properties of functions with one variable.						
	Integral calculus of functions with one variable antiderivatives: The process of finding antiderivatives and						
	integration formulas the substitution method of integration and integration by parts.						
Prerequisites	Knowledge of high school level m	athematics.					
and co-requisites Assessment methods	Subject passing criteria		Percentage of the final grade				
and co-requisites	Subject passing criteria	Passing threshold 50.0%	Percentage of the final grade 60.0%				
and co-requisites Assessment methods	, , , , , , , , , , , , , , , , ,	Passing threshold	• •
