

Subject card

Subject name and code	SUSTAINABLE DEVELOPMENT CONCEPT, PG_00058526						
Field of study	Economics						
Date of commencement of studies	October 2023		Academic year of realisation of subject		2024/2025		
Education level	first-cycle studies		Subject group		Optional subject group Subject group related to scientific research in the field of study		
Mode of study	Full-time studies		Mode of delivery		at the university		
Year of study	2		Language of instruction		Polish		
Semester of study	4		ECTS credits		4.0		
Learning profile	general academic profile		Assessment form		exam		
Conducting unit	Katedra Ekonomii -> Faculty of Management and Economics						
Name and surname of lecturer (lecturers)	Subject supervisor		dr hab. inż. Aleksandra Parteka				
	Teachers						
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	30.0	30.0	0.0	0.0	0.0	60
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	60		5.0		35.0	100
Subject objectives	Describes economic aspects of sustainable development concept.						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	[K6_W03] identifies reliable sources of information relevant to the analyzed issues		identifies reliable sources of information required to conduct economic analyzes of the implications of the sustainable development concept		[SW3] Assessment of knowledge contained in written work and projects [SW1] Assessment of factual knowledge		
	[K6_U06] acquires new knowledge by planning lifelong learning strategies		acquires new knowledge necessary to conduct economic analyzes of the implications of the sustainable development concept		[SU3] Assessment of ability to use knowledge gained from the subject		
Subject contents	The concept of sustainable economic development. Sustainable Development Goals Economic growth and 'post-growth' / 'de-growth' Theoretical approaches - from traditional economics to the economics of sustainable development Development measurement- from the traditional approach to holistic measures of development History of development in the world Development factors: physical capital, human capital, social capital, innovations Technology and technological progress in the processes of growth and development Demographic factors and migrations in sustainable economic development The problem of inequality, polarization and income distribution Sustainable resource management, natural environment, energy transition and circular economy The sharing economy The role of trade in sustainable development Sustainable development at the macroeconomic, regional and local level						
Prerequisites and co-requisites	Knowledge of basic macroeconomics						
Assessment methods and criteria	Subject passing criteria		Passing threshold		Percentage of the final grade		
	written exam		60.0%		50.0%		
	project		60.0%		50.0%
