	[K6_K02] can work in a group taking on different roles in it		Student is able to cooperate with the teacher and other students during the analysis of various physical problems aimed to find proper solution.		[SK2] Assessment of progress of work		
	[K6_U01] can obtain information from literature, databases and other sources; integrate the information obtained, interpret it and draw conclusions, formulate and justify opinions		Student is able to use various bibliographic resources and can make correct conclusions.		[SU1] Assessment of task fulfilment		
	[K6_W02] has basic knowledge of physics including electrostatics, electromagnetism, electrodynamics, wave motion, acoustics, mechanics, thermodynamics, optics, solid state physics; including knowledge necessary to understand the basic physical phenomena occurring in devices of systems and systems of automation and robotics		Student is able to recognize physical phenomena and connect them with correct relations what is necessary for solving real problems in various fields of technology if only specific mathematical formulas are used.		[SW1] Assessment of factual knowledge
