Subject objectives	The aim of the subject is to obtain the student,s competence in the range of using the basic methods of mathematical analysis and linear algebra. Furthermore, the student is able to use this knowledge to solve simple theoretical and practical problems that can be found in the field of engineering.						
Learning outcomes	Course outcome		Subject outcome			Method of verification	
	K6_W01		Student knows basic properties of elementary functions. Student solves equations and inequalities with elementary functions. Student examines monotonicity and boundedness of sequences Student evaluates the limits of sequences. Student performs calculations on complex numbers. Student determines the real and complex roots of polynomial.			[SW1] Assessment of factual knowledge	
	K6_K02		Student is able to work individually and in a group, knows how to estimate the time needed to carry out the task, and is able to implement the work schedule.			[SK3] Assessment of ability to organize work [SK1] Assessment of group work skills	
	K6_U01		Student is able to process the acquired information, analyze and interpret it, draw conclusions and reason opinions. Student understands the need of lifelong learning and improving their engineering knowledge.
