

Subject card

Subject name and code								
	Management and control in the power industry, PG_00058361							
Field of study	Hydrogen Technologies and Electromobility							
Date of commencement of studies	October 2023		Academic year of realisation of subject			2025/2026		
Education level	first-cycle studies		Subject group			Obligatory subject group in the field of study Subject group related to scientific research in the field of study		
Mode of study	Full-time studies		Mode of delivery			at the university		
Year of study	3		Language of instruction			Polish		
Semester of study	6		ECTS credits			2.0		
Learning profile	general academic profile		Assessment form			assessment		
Conducting unit	Zakład Przekształtnik Machines -> Faculty	Zakład Przekształtników i Magazynowania Energii -> Department of Power Electronics and Electric Machines -> Faculty of Electrical and Control Engineering				ectrical		
Name and surname	Subject supervisor		dr hab. inż. Robert Małkowski					
of lecturer (lecturers)	Teachers							
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Projec	t	Seminar	SUM
	Number of study hours	15.0	0.0	15.0	0.0		0.0	30
	E-learning hours inclu			i				i
Learning activity and number of study hours	Learning activity	Participation in classes include plan				udy	SUM	
	Number of study hours	30	2.0		18.0		50	
Subject objectives	Presentation of important issues related to the operation of the electric power system. The role of selected power facilities in voltage and frequency regulation will be discussed. The main factors affecting the development of blackout failures will be presented.							
Learning outcomes	Course outcome		Subject outcome			Method of verification		
	[K6_K01] is aware of the need for continuous education and self-improvement in the field of the profession of an electrician and knows the possibilities of further education		The student is able to indicate the appropriate area of his further education			[SK2] Assessment of progress of work		
	[K6_U12] can formulate a specification of simple engineering tasks of a practical nature related to the field of study		The student is able to describe the diagnostic process of a selected control system of a selected energy facility			[SU3] Assessment of ability to use knowledge gained from the subject		
	[K6_W16] has knowledge of the current state and the latest development trends related to the field of study.		The student knows the current development trends in the power system.			[SW1] Assessment of factual knowledge		
		related to the	system.
