	[K6_K02] can work in a group taking on different roles in it	The student is able to cooperate with the teacher and the colleagues when analyzing physical problems in order to search for the correct solution.			[SK2] Assessment of progress of work		
	[K6_W02] has knowledge of physics and chemistry including electrostatics, electromagnetism, electrodynamics, wave motion, acoustics, mechanics, thermodynamics, optics, solid state physics; including knowledge necessary to understand the basic physical phenomena occurring in hydrogen devices, systems and installations as well as automation and robotics systems	The student acquires the ability to associate physical phenomena and appropriate relationships, which can be used to solve real problems in various fields of technology, provided that appropriate mathematical relationships are used.			[SW1] Assessment of factual knowledge		
	[K6_U01] Is able to obtain information from literature, databases and other sources, integrate them, interpret them and draw conclusions and formulate opinions; has the ability to self-educate m.in. in order to improve professional competences	The student is able to use various bibliographic resources and he/she can make correct conclusions.			[SU1] Assessment of task fulfilment
