

## Subject card

Subject name and code	Optimization Methods, PG_00038273						
Field of study	Automation, Robotics and Control Systems						
Date of commencement of studies	October 2023	Academic year of realisation of subject			2023/2024		
Education level	second-cycle studies	Subject group			Obligatory subject group in the field of study Subject group related to scientific research in the field of study		
Mode of study	Part-time studies	Mode of delivery			at the university		
Year of study	1	Language of instruction			Polish		
Semester of study	1	ECTS credits			5.0		
Learning profile	general academic profile	Assessment form			exam		
Conducting unit	Department of Control Engineering -> Faculty of Electrical and Control Engineering						
Name and surname of lecturer (lecturers)	Subject supervisor	dr hab. Anna Witkowska					
	Teachers						
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	30.0	0.0	10.0	10.0	0.0	50
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours		Self-study	SUM	
	Number of study hours	50	5.0		70.0	125	
Subject objectives	The aim of the course is to familiarise with the methods of optimization and preparation for self problem solving in the field of optimization by using various computer tools.						
Learning outcomes	Course outcome	Subject outcome			Method of verification		
	K7_W14	The student knows the analytical and numerical algorithms for solving optimization; able to define the objective function, decision variables, constraints and boundary conditions.			[SW1] Assessment of factual knowledge		
	K7_U07	The student knows and is able to select an appropriate method and algorithm optimization for advanced problems in engineering practice			[SU1] Assessment of task fulfilment [SU3] Assessment of ability to use knowledge gained from the subject [SU4] Assessment of ability to use methods and tools		
	K7_W04	Students gain skills in the formulation of optimization problems, build mathematical models optimized task. Students can evaluate and make correct interpretation of the obtained solutions			[SW1] Assessment of factual knowledge		
	K7_K06	The student knows and is able to select an appropriate method and algorithm to solve the optimization problem for advanced problems in engineering practice			[SK5] Assessment of ability to solve problems that arise in practice		

Subject contents	<p>Optimization basics, repetytory range of degree studies. Dekomposition problems in linear and nonlinear aspects. Problems of discrete programming: integer, binary and mixed. Dekompsition methods for solving linear programming problems. Algorithms for a large array of issues rare. Gradient directions of the improvement in linear programming. Penalty function method. Dynamic Optimization: Continuous Bellman optimality principle, the principle of maximum Pontriagin. NP-problems: Cycles and Hamiltonian path. Seeking solutions to issues multipurpose optimization. Issues multilevel optimization problem. Problems of scheduling processes. Special modern optimization methods.</p> <p>Complex optimization problems. Rules modeling optimization problems. Building computational models of large issues. Decomposition of linear models. Studies of convergence of methods and rules for the selection method.</p>														
Prerequisites and co-requisites	Optimization and support of decision making														
Assessment methods and criteria	<table border="1" data-bbox="448 486 1487 524"> <thead> <tr> <th data-bbox="448 486 794 524">Subject passing criteria</th> <th data-bbox="794 486 1141 524">Passing threshold</th> <th data-bbox="1141 486 1487 524">Percentage of the final grade</th> </tr> </thead> <tbody> <tr> <td data-bbox="448 524 794 555">practical exercises</td> <td data-bbox="794 524 1141 555">60.0%</td> <td data-bbox="1141 524 1487 555">30.0%</td> </tr> <tr> <td data-bbox="448 555 794 586">project</td> <td data-bbox="794 555 1141 586">60.0%</td> <td data-bbox="1141 555 1487 586">30.0%</td> </tr> <tr> <td data-bbox="448 586 794 622">exam</td> <td data-bbox="794 586 1141 622">60.0%</td> <td data-bbox="1141 586 1487 622">40.0%</td> </tr> </tbody> </table>			Subject passing criteria	Passing threshold	Percentage of the final grade	practical exercises	60.0%	30.0%	project	60.0%	30.0%	exam	60.0%	40.0%
	Subject passing criteria	Passing threshold	Percentage of the final grade
