GDAŃSK UNIVERSITY OF TECHNOLOGY

Subject card

Subject name and code	Safety of Electrical Power Engineering System, PG_00003478		
Field of study	Electrical Engineering		
Date of commencement of studies	October 2023	Academic year of realisation of subject	2024/2025
Education level	second-cycle studies	Subject group	Optional subject group Subject group related to scientific research in the field of study
Mode of study	Part-time studies	Mode of delivery	at the university
Year of study	2	Language of instruction	Polish
Semester of study	3	ECTS credits	1.0
Learning profile	general academic profile	Assessment form	assessment
Conducting unit	Department of Electrical Power Engineering -> Faculty of Electrical and Control Engineering		
Name and surname of lecturer (lecturers)	Subject supervisor	prof. dr hab. inż. Ryszard Zajczyk	
	Teachers		

Lesson types and methods of instruction

Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
Number of study hours	10.0	0.0	0.0	0.0	0.0	10

E-learning hours included: 0.0

Learning activity and number of study hours

Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours	Self-study	SUM
Number of study hours	10	2.0	13.0	25

Subject objectives

To provide students with the problems of security of the power system.

Learning outcomes

Course outcome	Subject outcome	Method of verification
K7_W03	Student recognizes the basic issues as regards safety of the power system, explains basic processes occuring in the power system during emergency states as well as interprets occurences and processes occuring in the power system.	[SW2] Assessment of knowledge contained in presentation
K7_U10	Student recognizes the basic issues as regards safety of the power system, explains basic processes occuring in the power system during emergency states as well as interprets occurences and processes occuring in the power system.	[SU1] Assessment of task fulfilment
K7_W05	Student recognizes the basic issues as regards safety of the power system, explains basic processes occuring in the power system during emergency states as well as interprets occurences and processes occuring in the power system.	[SW3] Assessment of knowledge contained in written work and projects

Subject contents

The security of the Power system in time horizons. The existent structures of generating and transmitting electric energy, international connections, organisational and financial connections, emergency automation and restitution procedures and theis influence on power security. Methodology of forecasts/ prognoses demands for electric energy. The scope and results of privatization of electrical power engineering sector. The influence of market economy and international commitments. The impact of dispersed/ distributed generation on the power system. The importance of security automation and system automation in the process of stability loss, subsystems and islands? defence arrangements and restitution of the power system. Computer simulations of the system breakdowns.

Prerequisites and co-requisites

Knowledge of electrical Power engineering, Power systems, automation of security operations and control.
