

## Subject card

Subject name and code	Mechatronics II, PG_00047619							
Field of study	Automatic Control, Cybernetics and Robotics							
Date of commencement of studies			Academic year of realisation of subject			2025/2026		
Education level	first-cycle studies		Subject group			Optional subject group Subject group related to scientific research in the field of study		
Mode of study	Full-time studies		Mode of delivery			at the university		
Year of study	3		Language of instruction			Polish		
Semester of study	6		ECTS credits			3.0		
Learning profile	general academic profile		Assessment form			assessment		
Conducting unit	Department of Mechanics and Mechatronics -> Faculty of Mechanical Engineering and Ship Technology					echnology		
Name and surname	Subject supervisor	dr hab. inż. Rafał Hein						
of lecturer (lecturers)	Teachers		dr hab. inż. Ryszard Jasiński					
Lesson types and methods	Lesson type	Lecture	Tutorial	Laboratory	Projec	t	Seminar	SUM
of instruction	Number of study hours	0.0	0.0	15.0	15.0		0.0	30
	E-learning hours inclu			1		1		_
Learning activity and number of study hours	Learning activity	Participation in classes include plan				Self-study		SUM
	Number of study hours	30		3.0		42.0		75
Subject objectives	The aim of the course is to acquire practical skills in designing and building hydraulic, pneumatic, electric, mechanical and mechatronic control systems. The subject consists of the design and laboratory parts. In the design part, students carry out assigned theoretical projects, and in the laboratory part, they carry out practical tasks for controlling mechatronic systems.							
Learning outcomes	Course outcome		Subject outcome			Method of verification		
	[K6_W03] Knows and understands, to an advanced extent, the construction and operating principles of components and systems related to the field of study, including theories, methods and complex relationships between them and selected specific issues - appropriate for the curriculum		The student has the knowledge in mechanics, construction and operation of machines, electronics, automation and control enabling modeling and design of mechatronic systems.			[SW3] Assessment of knowledge contained in written work and projects [SW2] Assessment of knowledge contained in presentation		
	[K6_W02] Knows and understands, to an advanced extent, selected laws of physics and physical phenomena as well as methods and theories explaining the complex relationships between them, constituting the basic general knowledge in the field of technical sciences related to the field of study		The student has knowledge in mechanics, construction and operation of machines, electronics, automation and control as well as understands the laws and phenomena occurring at the stage of operation of the products and production processes designed by him.			[SW1] Assessment of factual knowledge [SW2] Assessment of knowledge contained in presentation

Subject contents	The design part includes the plan of mechatronic system.							
	The following topics are realised in the laboratory part:							
	The following topics are realised in the laboratory part.							
	Complex and analysis of analysis and analysis and an accomplish to the least to the							
	Synthesis and analysis of combinational and sequential logical control systems.							
	PLC programming in the application to the sequential control systems.							
	Laboratory investigation of servo-mechanism with state variable feedback.							
	Laboratory research of temperature control system using PID controller and D/A, A/D converter.  PLC programming module of assembly system MAS-200.							
Prerequisites	Ability to synthesize combinational and sequential control systems. Knowledge of languages and the basics of PLC and microcontroller programming. Basic knowledge of measurement systems, including the							
and co-requisites	operation of physical quantity sensor		ent systems, including the					
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade					
	Project	56.0%	50.0%					
	Practical exercise	56.0%	50.0%
