

Subject card

Subject name and code	Electronic Circuits - laboratory, PG_00049312						
Field of study	Biomedical Engineering						
Date of commencement of studies	October 2023	Academic year of realisation of subject			2024/2025		
Education level	first-cycle studies	Subject group			Obligatory subject group in the field of study Subject group related to scientific research in the field of study		
Mode of study	Full-time studies	Mode of delivery			at the university		
Year of study	2	Language of instruction			Polish		
Semester of study	4	ECTS credits			1.0		
Learning profile	general academic profile	Assessment form			assessment		
Conducting unit	Department of Microelectronic Systems -> Faculty of Electronics, Telecommunications and Informatics						
Name and surname of lecturer (lecturers)	Subject supervisor	dr hab. inż. Jacek Jakusz					
	Teachers	dr hab. inż. Jacek Jakusz					
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	0.0	0.0	15.0	0.0	0.0	15
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours		Self-study		SUM
	Number of study hours	15	1.0		9.0		25
Subject objectives	knowledge of instruments and retention of theoretical knowledge on the structure and properties of electronic systems of linear electronic circuits in the student's lab.						
Learning outcomes	Course outcome		Subject outcome			Method of verification	
	[K6_U03] can design, according to required specifications, and make a simple device, facility, system or carry out a process, specific to the field of study, using suitable methods, techniques, tools and materials, following engineering standards and norms, applying technologies specific to the field of study and experience gained in the professional engineering environment		The student is able to calculate the values of basic elements of transistor amplifiers.			[SU1] Assessment of task fulfilment [SU4] Assessment of ability to use methods and tools	
	[K6_U01] can apply mathematical knowledge to formulate and solve complex and non-typical problems related to the field of study and perform tasks, in an innovative way, in not entirely predictable conditions, by:n- appropriate selection of sources and information obtained from them, assessment, critical analysis and synthesis of this information,n- selection and application of appropriate methods and toolsn		The student is able to calculate the parameters of electronic circuits and then perform their practical measurements. In this way, it strengthens the knowledge of structures and parameters of analog electronic circuits discussed during the lecture.			[SU1] Assessment of task fulfilment [SU4] Assessment of ability to use methods and tools	
Subject contents	1. CMOS programmable array for analog circuit applications 2. Basic gain stages for MOS amplifiers 3. Amplifier with negative feedback loop 4. Bipolar wideband amplifiers 5. Differential pair amplifier 6. Phase-locked oscillator (PLL) 7. Diode rectifier and voltage regulator 8. Buck DC/DC converter						

Prerequisites and co-requisites	Is required to pass the lecture "ELECTRONIC CIRCUITS" on the 3rd semester		
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	Practical exercise	50.0%	100.0%
Recommended reading	Basic literature	Guziński A: "Liniowe elektroniczne układy analogowe", WNT, 1994 Tietze U., Schenk Ch.: "Układy półprzewodnikowe", WNT2009 Sedra A.S., Smith K.C.: "Microelectronic circuits", Oxford University Press, New York, Oxford, 2004	
	Supplementary literature	No requirements	
	eResources addresses	Adresy na platformie eNauczanie:	
Example issues/ example questions/ tasks being completed			
Work placement	Not applicable
