

Subject card

Subject name and code	Team Project II, PG_00053514								
Field of study	Electronics and Telecommunications								
Date of commencement of studies	October 2023		Academic year of realisation of subject			2025/2026			
Education level	first-cycle studies		Subject group			Optional subject group Subject group related to scientific research in the field of study			
Mode of study	Full-time studies		Mode of delivery			at the university			
Year of study	3		Language of instruction			Polish			
Semester of study	6		ECTS credits			2.0			
Learning profile	general academic profile		Assessment form			assessment			
Conducting unit	Department of Computer Communications -> Faculty of Electronics, Telecommunications and Informatics								
Name and surname	Subject supervisor		dr inż. Sławor						
of lecturer (lecturers)	Teachers								
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Projec	t	Seminar	SUM	
	Number of study hours	0.0	0.0	0.0	30.0		0.0	30	
	E-learning hours included: 0.0								
Learning activity and number of study hours	dy hours Learning activity Participation in didactic classes included in study plan			Participation in consultation hours		Self-study		SUM	
	Number of study hours	30		5.0		15.0		50	
Subject objectives	Group project is a class, which goal is to prepare students for a future work in a team of several people and to learn them to fulfil scheduled obligations in a timely manner. Project teams consisting of 3-5 students realize subjects chosen from submitted proposals. A product and a proper technical documentation are the effects of a year-long work on a chosen problem. The project proposals can be submitted by Department partners and a work progress is controlled by supervisors assigned by a faculty coordinator.

Learning outcomes	Learning outcomes Course outcome		Method of verification				
	[K6_U08] while identifying and formulating specifications of engineering tasks related to the field of study and solving these tasks, can:n- apply analytical, simulation and experimental methods,n- notice their systemic and non-technical aspects,n-make a preliminary economic assessment of suggested solutions and engineering work n		[SU3] Assessment of ability to use knowledge gained from the subject [SU4] Assessment of ability to use methods and tools				
	[K6_U03] can design, according to required specifications, and make a simple device, facility, system or carry out a process, specific to the field of study, using suitable methods, techniques, tools and materials, following engineering standards and norms, applying technologies specific to the field of study and experience gained in the professional engineering environment	The student is able to design, in accordance with the given specification, and perform a complex device, object, ICT system or implement the ICT process, using appropriately selected methods, techniques, tools and materials, using engineering standards and norms, using ICT technologies and using experience gained in the environment professionally engaged in engineering activities	[SU1] Assessment of task fulfilment [SU2] Assessment of ability to analyse information [SU3] Assessment of ability to use knowledge gained from the subject [SU4] Assessment of ability to use methods and tools [SU5] Assessment of ability to present the results of task				
	[K6_K01] is ready to cultivate and disseminate models of proper behaviour in and outside the work environment; make independent decisions; critically evaluate actions of their own, teams they lead and organisations they are part of; take responsibility for results of these actions; responsibly perform professional roles, including:n - observing rules of professional ethics and require it from others,n - care for the achievements and traditions of the professionn	the student has the knowledge to develop patterns of proper conduct in the work and life environment, critically evaluate the groups in which he participates and lead the group and the appropriate division of roles and tasks among group members	[SK5] Assessment of ability to solve problems that arise in practice				
	[K6_W08] Knows and understands the fundamental dilemmas of modern civilisation and basic economic, legal and other conditions of various types of activities related to the field of study, including the basic concepts and principles in the field of industrial property and copyright protection.	the student has the knowledge to assess the economic and legal possibilities of the project implementation	[SW1] Assessment of factual knowledge [SW3] Assessment of knowledge contained in written work and projects				
	[K6_U11] can plan and organise individual and team work	the student understands the role of management in the project, knows and applies the chosen method of managing work in a group, supervising the production of project documentation	[SU1] Assessment of task fulfilment				
Subject contents	The choice of group						
	Implementation of the project group						
	Presentation of the completed project	ct					
Prerequisites and co-requisites							
Assessment methods and criteria	Subject passing criteria project	Passing threshold 50.0%	Percentage of the final grade 100.0%				
Recommended reading	Basic literature	materials related to the implemented project					
	Supplementary literature	Books on management					
	eResources addresses	Adresy na platformie eNauczanie:					

Data wydruku: 19.05.2024 07:02 Strona 2 z 3

example questions/ tasks being completed	Implementation of OpenFlow controller extensions for control of network with channel switching System for analyzing character movements supporting the rehabilitation processShining 3D LED cube - disco lightingIntelligent scheduleGPS signal repeaterRemote parameter measurement system for a super- yacht class vessel.Mobile support system for Special Rescue GroupsSystem supporting the rehabilitation of children with movement disorders using the EMG signal to control the gameMobile robot for the critical infrastructure inspection
Work placement	Not applicable
