## Subject card

| Subject name and code | Advanced Mathematics, PG_00047393 |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Field of study | Electronics and Telecommunications |  |  |  |  |  |  |
| Date of commencement of studies | October 2023 |  | Academic year of realisation of subject |  |  | 2023/2024 |  |
| Education level | second-cycle studies |  | Subject group |  |  | Obligatory subject group in the field of study <br> Subject group related to scientific research in the field of study |  |
| Mode of study | Full-time studies |  | Mode of delivery |  |  | at the university |  |
| Year of study | 1 |  | Language of instruction |  |  | English |  |
| Semester of study | 2 |  | ECTS credits |  |  | 6.0 |  |
| Learning profile | general academic profile |  | Assessment form |  |  | exam |  |
| Conducting unit | Mathematics Center -> Vice-Rector for Education |  |  |  |  |  |  |
| Name and surname of lecturer (lecturers) | Subject supervisor |  | dr Magdalena Musielak |  |  |  |  |
|  | Teachers |  | dr Magdalena Musielak |  |  |  |  |
| Lesson types and methods of instruction | Lesson type | Lecture | Tutorial | Laboratory | Project | Seminar | SUM |
|  | Number of study hours | 30.0 | 15.0 | 0.0 | 0.0 | 0.0 | 45 |
|  | E-learning hours included: 0.0 |  |  |  |  |  |  |
| Learning activity and number of study hours | Learning activity | Participation in didactic classes included in study plan |  | Participation in consultation hours |  | Self-study | SUM |
|  | Number of study hours | 45 |  | 15.0 |  | 90.0 | 150 |
| Subject objectives | The use of specialized mathematical tools to technical subjects. |  |  |  |  |  |  |
| Learning outcomes | Course outcome |  | Subject outcome |  |  | Method of verification |  |
|  | [K7_W01] Knows and understands, to an increased extent, mathematics to the extent necessary to formulate and solve complex issues related to the field of study. |  | Student knows the basic concepts and theorems of linear algebra, knows the basics of functional analysis, knows the types of differential and integral equations, knows theorems and techniques of solving ordinary differential equations and partial differential equations. |  |  | [SW1] Assessment of factual knowledge |  |
|  | [K7_U01] can apply mathematical knowledge to formulate and solve complex and non-typical problems related to the field of study by:nappropriate selection of source information and its critical analysis, synthesis, creative interpretation and presentation,napplication of appropriate methods and toolsn |  | Student uses the notion of linear space, linear transformation, determines matrices of linear transformations in different bases, demonstrates methods for solving differential and integral equations, analyzes stability of linear and nonlinear systems of differential equations. |  |  | [SU4] Assessment of ability to use methods and tools |  |

| Subject contents | Linear space. Basic concepts. to the base. Linear operators. Hilbert Space. Space L²[-,]. <br> First order ordinary differential Lagrange equation and Clairau reducible to first order. Higher equations. Second order linea equations.Qualitative analysis <br> Integral equations. Basic termi differential equations into integ approximations, iterated kerne <br> Partial differential equations. B differential equations of second Classification of equations. Re Wave equation. Heat conduction | r subspace. Basis and dime concepts. Matrix of linear tr <br> tions. Basic concepts. Separ uation. Exact equations. Inter linear equations with consta ations with nonconstant coef utions of ordinary differentia <br> . Classification. Volterra an uations. Methods for solving olvent. <br> concepts. First order partial . Methods to solve linear p equations to canonical form uation. Laplace equation. | linear space. Coordinates of vector ation. Change of basis matrix. <br> uations. Bernoulli equation. factor. Second order equations cients. Higher order Euler Systems of differential ns. Lapunov stability. <br> Im equation. Transforming equations. Successive <br> al equations. Linear partial rential equations of second order. equation in one dimensional case. |

| Example issues/ example questions/ tasks being completed | 1. Verify if the given transformation $T: R_{2 \times 2} R_{2}[x]$ is linear. In case of positive answer find ker $T, i m T$, dim ker T, dim im T. T ([ a b; c d ])= ax²+(b-c)x+d (R2x2,+,') vector space of real matrices of order 2, with addition and scalar multiplications, $\left(\mathrm{R}_{2}[\mathrm{x}],+, \cdot\right)$ vector space of real polynomials of order at most 2 , with addition and scalar multiplications.) <br> 2. Solve the following nonhomogeneous linear equation. $y^{\prime \prime \prime}+y^{\prime \prime}=(x-1) /\left(x^{2}\right)$. <br> 3. Examine stability of equilibrium points of the system $\left\{x^{\prime}=x y+2 y^{\wedge} 2 ; y^{\prime}=(y-1)(x+2)\right.$ <br> 4. Find the integral surface passing through given curve $(u) /(x)+y(u) /(y)=u^{2} y, y=t, y=t^{2}, u=1$. <br> 5. Classify the equation and find its characteristics $\left({ }^{2} u\right) /\left(x^{2}\right)-2 \cos x\left({ }^{2} u\right) /(x y)-\left(3+\sin ^{2} x\right)\left({ }^{2} u\right) /\left(I y^{2}\right)-y$ $(u) /(y)=0$. <br> 6. Find the resolvent kernel, if $K(x, t)=x^{2} t^{2} ; a=-1, b=1$. |  |  |
| Work placement | Not applicable |  |  |
