

## GDAŃSK UNIVERSITY

## Subject card

| Subject name and code                       | Software Defined Radio Technique, PG_00047476  |  |   |                                     |        |   |         |     |  |
|---|--|--|---|-------------------------------------|--------|---|---------|-----|--|
| Field of study                              | Electronics and Telecommunications   |  |   |                                     |        |   |         |     |  |
| Date of commencement of studies             | October 2023   |  | Academic year of realisation of subject   |                                     |        | 2024/2025   |         |     |  |
| Education level                             | second-cycle studies   |  | Subject group   |                                     |        | Optional subject group<br>Subject group related to scientific<br>research in the field of study |         |     |  |
| Mode of study                               | Full-time studies  |  | Mode of delivery  |                                     |        | at the university   |         |     |  |
| Year of study                               | 2  |  | Language of instruction   |                                     |        | English   |         |     |  |
| Semester of study                           | 3  |  | ECTS credits  |                                     |        | 1.0   |         |     |  |
| Learning profile                            | general academic profile   |  | Assessment form   |                                     |        | exam  |         |     |  |
| Conducting unit                             | Department of Radiocommunication Systems and Networks -> Faculty of Electronics, Telecommunications<br>and Informatics   |  |   |                                     |        |   |         |     |  |
| Name and surname of lecturer (lecturers)    | Subject supervisor   |  | dr inż. Andrzej Marczak   |                                     |        |   |         |     |  |
|   | Teachers   |  | dr inż. Andrzej Marczak   |                                     |        |   |         |     |  |
| Lesson types and methods of instruction     | Lesson type  | Lecture  | Tutorial  | Laboratory                          | Projec | t   | Seminar | SUM |  |
|   | Number of study hours  | 15.0   | 0.0   | 0.0                                 | 0.0    |   | 0.0     | 15  |  |
|   | E-learning hours included: 0.0   |  |   |                                     |        |   |         |     |  |
| Learning activity and number of study hours | Learning activity  | Participation in didactic<br>classes included in study<br>plan |   | Participation in consultation hours |        | Self-study  |         | SUM |  |
|   | Number of study hours  | 15   |   | 2.0                                 |        | 8.0   |         | 25  |  |
| Subject objectives                          | Students learn software defined radio technology.  |  |   |                                     |        |   |         |     |  |
| Learning outcomes                           | Course outcome   |  | Subject outcome   |                                     |        | Method of verification  |         |     |  |
|   | [K7_W03] Knows and<br>understands, to an increased<br>extent, the construction and<br>operating principles of<br>components and systems related<br>to the field of study, including<br>theories, methods and complex<br>relationships between them and<br>selected specific issues -<br>appropriate for the curriculum.  |  | The student knows and<br>understands the role of individual<br>blocks in the radio transmitter and<br>receiver implemented in software<br>defined radio technology. |                                     |        | [SW1] Assessment of factual knowledge   |         |     |  |
|   | [K7_W04] Knows and<br>understands, to an advanced<br>extent, the principles, methods<br>and techniques of programming<br>and the principles of computer<br>software development or<br>programming devices or<br>controllers using microprocessors<br>or programmable elements or<br>systems specific to the field of<br>study, and organisation of<br>systems using computers or such<br>devices |  |   |                                     |        | [SW1] Assessment of factual knowledge   |         |     |  |

| Subject contents   | <ol> <li>Concept of Software Defined Radio (SDR) technology.</li> <li>Construction of SDR transceiver.</li> <li>The technical requirements for SDR receiver.</li> <li>The technical requirements for SDR transmitter.</li> <li>The SDR hardware platforms architecture.</li> <li>Structure and properties of the SDR hardware platforms.</li> <li>Signal processing in the SDR hardware platforms.</li> <li>Concept of Software Communications Architecture (SCA).</li> <li>Properties of the SCA.</li> <li>Structure and properties of the radio system compatible with the SCA architecture.</li> <li>An example of software that is compatible with the SCA architecture.</li> <li>Software tools supporting the implementation of the radio interface in the SDR technology.</li> <li>Example of a digital radio communication system transceiver implementation in the SDR technology.</li> <li>Examples of commercial use of devices implemented in the SDR technology .</li> </ol> |   |                               |  |  |  |
