GDAŃSK UNIVERSITY OF TECHNOLOGY

Subject card

Subject name and code	PRODUCTION MANAGEMENT, PG_00061331		
Field of study	Engineering Management		
Date of commencement of studies	October 2023	Academic year of realisation of subject	2024/2025
Education level	first-cycle studies	Subject group	Obligatory subject group in the field of study Subject group related to scientific research in the field of study
Mode of study	Full-time studies	Mode of delivery	blended-learning
Year of study	2	Language of instruction	Polish
Semester of study	3	ECTS credits	5.0
Learning profile	general academic profile	Assessment form	exam
Conducting unit	Katedra Inżynierii Zarządzania i Jakości -> Faculty of Management and Economics		
Name and surname of lecturer (lecturers)	Subject supervisor	dr inż. Joanna Czerska	
	Teachers	dr inż. Joanna Czerska dr inż. Ewa Marjańska	

Lesson types and methods of instruction

Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
Number of study hours	30.0	0.0	0.0	30.0	0.0	60

E-learning hours included: 36.0

Learning activity and number of study hours

Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours	Self-study	SUM
Number of study hours	60	7.0	58.0	125

Subject objectives

Designs production processes based on data and good practices in production management, preparing the project for implementation in everyday production.

Learning outcomes

Course outcome	Subject outcome	Method of verification
[K6_W03] identifies reliable sources of information relevant to the analyzed issues	correctly interprets all components of the production process, preparing a set of reliable information needed for its analysis, improvement and design as well as making responsible operational decisions	[SW1] Assessment of factual knowledge
[K6_U05] designs innovative solutions for complex management processes, using appropriate methods and techniques	designs innovative solutions for production processes, taking into account technological, economic and environmental factors as well as customer needs	[SU1] Assessment of task fulfilment

<table>
<tr><td>Subject contents</td><td>Introduction

• Basic concepts related to production management
• Organization of information and material flow in production processes with elements of logistics management in production
• Production management concepts and current trends in production management

Product design and technology
• Input from the R&D department: product design and bill of materials
• Input data from the technology department: technological operations, product labor consumption, list of machines
• Map of the manufacturing process. Cycle time of an employee, machine, product
Designing generation capacity taking into account seasonal demand
• Customer tact calculation
• Calculation of the number of employees, taking into account holidays and absenteeism
Production efficiency management
• Analysis of effectiveness and efficiency losses (OEE, Pareto losses)
• Fundamentals of maintenance management. Total Productive Maintenance

Production flexibility management. Techniques for increasing production flexibility

• Flexibility calculation (EPE) for job and process
• Rules for determining the minimum production lot (MOQ and EOQ)
Flow design
• Workforce Analysis and workload Balancing (Yamazumi)
• Principles of designing a production cell
Employee competency management
• Competency matrices, methods of assessing the complexity of competencies, planning an employee's development path
• Classification of work at the workstation
• Classification of work and levels of competence
• Verification of the employee's knowledge and skills
• Standardization of work
• Types of work standards and principles of building standards
• On-the-job training. Methods of instruction and principles of conducting instruction
Indicators (KPI) in production management
• Where do they come from and why are they important. How to obtain data for calculating indicators
• Visual performance management
• Designing the agenda of visual meetings
• Rules for monitoring losses at workstations
Environmental aspects in production</td></tr>
<tr><td>Prerequisites and co-requisites</td><td></td></tr>
<tr><td>Assessment methods and criteria</td><td>
<table>
