

Subject card

Subject name and code	CYBERSECURITY MANAGEMENT, PG_00061382						
Field of study	Engineering Management						
Date of commencement of studies	October 2023		Academic year of realisation of subject		2025/2026		
Education level	first-cycle studies		Subject group		Optional subject group Subject group related to scientific research in the field of study		
Mode of study	Full-time studies		Mode of delivery		at the university		
Year of study	3		Language of instruction		Polish		
Semester of study	6		ECTS credits		3.0		
Learning profile	general academic profile		Assessment form		assessment		
Conducting unit	Department Of Informatics In Management -> Faculty Of Management And Economics -> Wydziały Politechniki Gdańskiej						
Name and surname of lecturer (lecturers)	Subject supervisor		dr hab. inż. Rafał Leszczyna				
	Teachers		dr hab. inż. Rafał Leszczyna				
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	0.0	15.0	0.0	0.0	30
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	30		6.0		39.0	75
Subject objectives	Analyzes and critically assesses threats to cybersecurity of the company's IT resources, designing appropriate protection measures						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	[K6_U07] applies information technology to improve critical analysis and evaluation of data and management processes		critically assesses the problems of cybersecurity threats in the enterprise and defines appropriate protection measures		[SU3] Assessment of ability to use knowledge gained from the subject		
	[K6_W03] identifies reliable sources of information relevant to the analyzed issues		analyzes the enterprise and its IT resources, identifying cybersecurity threats		[SW1] Assessment of factual knowledge		
Subject contents	Basic concepts and concepts of cyber security Usable cybersecurity Cybersecurity management proces Cybersecurity risk management Cyber security threats Selected standards and guidelines for cybersecurity Security						
Prerequisites and co-requisites							
Assessment methods and criteria	Subject passing criteria		Passing threshold		Percentage of the final grade		
	Laboratory exercises		60.0%		50.0%		
	Active participation in the lecture		60.0%		5.0%		
	Knowledge test		60.0%		45.0%		
Recommended reading	Basic literature		ISO/IEC 27001:2017 NIST SP 800-53 Revision 5 Computer security handbook, edited by Seymour Bosworth, M. E. Kabay and Eric Whyne. 6th ed. Wiley, 2014 Ross Anderson, Security Engineering Third Edition, https://www.cl.cam.ac.uk/~rja14/book.html David Kennedy, Jim OGorman, Devon Kearns, and Mati Aharoni, Metasploit: The Penetration Testers Guide, No Starch Press, 2011				

	Supplementary literature	Stuart McClure, Joel Scambray, George Kurtz, Hacking Exposed: Network Security Secrets & Solutions, Osborne/McGraw-Hill, 2001 Matt Bishop, Introduction to Computer Security, Prentice Hall PTR 2004 Micki Krause, Harold F. Tipton, Information Security Management Handbook, Auerbach 2007 Steve Purser, A Practical Guide to Managing Information Security, Artech 2004 Matt Bishop, Computer Security: Art and Science, Addison Wesley 2002 ISO/IEC 15408 (Common Criteria) Sjaak Laan, IT Infrastructure Architecture Infrastructure Building Blocks and Concepts, Lulu Press Inc. 2017
	eResources addresses	Adresy na platformie eNauczanie:
Example issues/ example questions/ tasks being completed	Perform an enterprise analysis. Identify and describe its cyber resources Identify independent cybersecurity risk lists and develop your own cyberthreat list Estimate your cybersecurity risk Explain a systematic approach to enterprise cybersecurity management Choose a cybersecurity standard, justify your choice Give an example of a violation of the integrity of a cyber resource Give an example of a security measure to reduce the risk of accounting data being copied by unauthorized users Provide and explain the formula for cybersecurity risk Point out and explain the most common strategies for dealing with cybersecurity threats Describe the basic features of access control	
Work placement	Not applicable	

Document generated electronically. Does not require a seal or signature.
