Example issues/ example questions/ tasks being completed	Company X issued 1,000,000 shares and invested the capital obtained in this way in a new production line. The annual profit from sales amounted to PLN 5,000,000. The company issued 500,000 new shares and the capital obtained was allocated to expanding production. This decision resulted in an increase in annual profit to PLN 6,000,000. The goal of increasing profit was achieved. But will shareholders assess such management positively? Company X purchased a machine with an initial value of PLN 10,000. The expected number of products that can be manufactured using this means is 50,000 pieces, and the useful life is 8 years. In the first year, the company produced 5,000 finished products.a) Calculate the annual depreciation rate using the natural method (in the first year).b) Calculate the annual depreciation rate using the straight-line method.c) Knowing that the depreciation rate is 30%, calculate the annual depreciation rate using the decreasing present value method.d) Calculate the depreciation rates using the modified method, knowing that the depreciation rate is 30%.e) Calculate the annual depreciation rate using the method using the sum of years of use method.
