

Subject card

Subject name and code	Hydrogeology, PG_00058798						
Field of study	Environmental Engineering						
Date of commencement of studies	October 2023		Academic year of realisation of subject		2024/2025		
Education level	first-cycle studies		Subject group		Obligatory subject group in the field of study Subject group related to scientific research in the field of study		
Mode of study	Full-time studies		Mode of delivery		at the university		
Year of study	2		Language of instruction		Polish		
Semester of study	4		ECTS credits		5.0		
Learning profile	general academic profile		Assessment form		exam		
Conducting unit	Department of Geotechnical and Hydraulic Engineering -> Faculty of Civil and Environmental Engineering						
Name and surname of lecturer (lecturers)	Subject supervisor		prof. dr hab. inż. Adam Szymkiewicz				
	Teachers						
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	30.0	15.0	0.0	15.0	0.0	60
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	60		7.0		58.0	125
Subject objectives	Familiarizing students with basics of groundwater (occurrence, flow dynamics, chemical composition, possibilities of usage).						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	[K6_U04] can recognize basic rocks and minerals, can create and read maps and geological and hydrogeological sections; can read and interpret geological documentation		Student can draw and analyze hydrogeological maps and crossections		[SU1] Assessment of task fulfilment		
	[K6_W04] possesses elementary knowledge in the field of land mechanics, ground science, land reclamation and geotechnics; has basic knowledge about the composition of air, water and soil, environmental pollution and processes responsible for their formation and ways to reduce them, knows the principles and organization of sustainable water management		Student knows the basic processes leading to groundwater contamination		[SW1] Assessment of factual knowledge		
	K6_W12		Student knows the mechanisms of formation and flow of groundwater		[SW1] Assessment of factual knowledge		
	[K6_W06] has a structured and theoretically founded knowledge in the field of computer science, numerical methods and the possibilities of their applications for solving tasks, description of phenomena related to the flow of water in the environment, in open pipes and channels, filtration, migration of pollutants		Student knows the basic calculation methods and tools for groundwater flow		[SW1] Assessment of factual knowledge		
Subject contents	Origin and occurrence of groundwater. Hydrogeological properties of soils and rocks. Flow in saturated and unsaturated zones, groundwater flow systems. Groundwater abstraction, well hydraulics, dewatering. Chemistry and contamination of groundwater.						

Prerequisites and co-requisites	basic maths (differential and integral calculus), basic chemistry		
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	Exam	55.0%	50.0%
	Evaluation of exercises and projects	55.0%	50.0%
Recommended reading	Basic literature	Pazdro Z., Kozerski B. Hydrogeologia ogólna Wyd. Geol. Warszawa 1990	
	Supplementary literature	Wieczysty A., Hydrogeologia Inżynierska, PWN, Warszawa 1982 Domenico P.A., Schwartz F.W., Physical and chemical hydrogeology, Wiley, 1998	
	eResources addresses	Adresy na platformie eNauczanie:	
Example issues/ example questions/ tasks being completed	Estimation of hydraulic permeability based on soil granulometry Design of excavation dewatering Interpretation of chemical analyses of groundwater samples		
Work placement	Not applicable		

Document generated electronically. Does not require a seal or signature.
