

## Subject card

|   |  |  |  |                                       |  |            |     |
|---|--|--|--|---------------------------------------|--|------------|-----|
| Subject name and code   | Descriptive Geometry, PG_00058734  |  |  |                                       |  |            |     |
| Field of study  | Environmental Engineering  |  |  |                                       |  |            |     |
| Date of commencement of studies   | October 2023   | Academic year of realisation of subject  |  |                                       | 2023/2024                                      |            |     |
| Education level   | first-cycle studies  | Subject group  |  |                                       | Obligatory subject group in the field of study |            |     |
| Mode of study   | Full-time studies  | Mode of delivery   |  |                                       | at the university                              |            |     |
| Year of study   | 1  | Language of instruction  |  |                                       | Polish   |            |     |
| Semester of study   | 1  | ECTS credits   |  |                                       | 2.0  |            |     |
| Learning profile  | general academic profile   | Assessment form  |  |                                       | assessment                                     |            |     |
| Conducting unit   | Katedra Wytrzymałości Materiałów -> Faculty of Civil and Environmental Engineering   |  |  |                                       |  |            |     |
| Name and surname of lecturer (lecturers)  | Subject supervisor   | dr inż. Bożena Kotarska-Lewandowska  |  |                                       |  |            |     |
|   | Teachers   | dr inż. Bożena Kotarska-Lewandowska<br>dr inż. arch. Romanika Okraszewska<br>dr inż. Karol Daszkiewicz |  |                                       |  |            |     |
| Lesson types and methods of instruction   | Lesson type  | Lecture  | Tutorial   | Laboratory                            | Project  | Seminar    | SUM |
|   | Number of study hours  | 0.0  | 15.0   | 0.0                                   | 15.0   | 0.0        | 30  |
|   | E-learning hours included: 0.0   |  |  |                                       |  |            |     |
| Learning activity and number of study hours   | Learning activity  | Participation in didactic classes included in study plan   |  | Participation in consultation hours   |  | Self-study | SUM |
|   | Number of study hours  | 30   |  | 5.0                                   |  | 20.0       | 55  |
| Subject objectives  | Preparation for recording engineering structures in a technical drawing, projection principles. Presentation of basic constructions in geometric projections (Monge projection, topographic projection). Getting knowledge how to use geometry to solve basic engineering problems   |  |  |                                       |  |            |     |
| Learning outcomes   | Course outcome   |  | Subject outcome  |                                       | Method of verification                         |            |     |
|   | [K6_U07] can read architectural, construction and geodesy drawings, and can use the known computer programs to prepare a drawing part of technical documentation for the sanitary industry   |  | can read construction drawings, can apply the basics of the topographic and Monge projection |                                       | [SU1] Assessment of task fulfilment            |            |     |
| [K6_W15] knows the rules of descriptive geometry and technical drawing regarding the recording and reading of architectural drawings, construction and surveying drawings, as well as their preparation with the use of CAD |  | knows the basics of the topographic and Monge projection   |  | [SW1] Assessment of factual knowledge |  |            |     |
| Subject contents  | Topographic projection. Lines and planes in topographic projection. Spatial relations and common elements. Design of slopes, embankments and excavations for squares and roads.<br><br>Monge projection. Location of a point, line and plane in space. Mutual position of lines and planes. Common elements (intersection line). Basic constructions. Transformation and its applications. Projection of polyhedra. Intersection of polyhedrons with a straight line or a plane. |  |  |                                       |  |            |     |
| Prerequisites and co-requisites   |  |  |  |                                       |  |            |     |

| Assessment methods and criteria                                | Subject passing criteria                              | Passing threshold   | Percentage of the final grade |
|--|---|---|-------------------------------|
|  | ocena rozwiązania ćwiczeń                             | 60.0%   | 50.0%                         |
|  | ocena kolokwium                                       | 60.0%   | 50.0%                         |
