

Subject card

Subject name and code	, PG_00059052						
Field of study	Environmental Engineering						
Date of commencement of studies	October 2023	Academic year of realisation of subject			2024/2025		
Education level	first-cycle studies	Subject group			Obligatory subject group in the field of study Subject group related to scientific research in the field of study		
Mode of study	Part-time studies	Mode of delivery			at the university		
Year of study	2	Language of instruction			Polish		
Semester of study	4	ECTS credits			4.0		
Learning profile	general academic profile	Assessment form			assessment		
Conducting unit	Department of Geotechnical and Hydraulic Engineering -> Faculty of Civil and Environmental Engineering						
Name and surname of lecturer (lecturers)	Subject supervisor	dr hab. Małgorzata Pruszkowska-Caceres					
	Teachers	dr inż. Marzena Wójcik dr hab. Małgorzata Pruszkowska-Caceres					
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	10.0	0.0	0.0	0.0	25
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours		Self-study	SUM	
	Number of study hours	25	6.0		70.0	101	
Subject objectives	To familiarize student with the mechanisms of formation and movement of groundwater, with the possibilities of groundwater exploitation and with potential risks of contamination.						
Learning outcomes	Course outcome	Subject outcome			Method of verification		
	[K6_W06] has a structured and theoretically founded knowledge in the field of computer science, numerical methods and the possibilities of their applications for solving tasks, description of phenomena related to the flow of water in the environment, in open pipes and channels, filtration, migration of pollutants	Student is familiar with basic computational method and tools for solution of groundwater flow problems. Student is familiar with basic mechanisms of groundwater contamination and with basic principles of assessing groundwater resources.			[SW1] Assessment of factual knowledge		
	[K6_W04] possesses elementary knowledge in the field of land mechanics, ground science, land reclamation and geotechnics; has basic knowledge about the composition of air, water and soil, environmental pollution and processes responsible for their formation and ways to reduce them, knows the principles and organization of sustainable water management	Student is able to obtain information from hydrogeological gross-sections and maps and to interpret well pumping tests.			[SW1] Assessment of factual knowledge [SW3] Assessment of knowledge contained in written work and projects		
	[K6_U04] can recognize basic rocks and minerals, can create and read maps and geological and hydrogeological sections; can read and interpret geological documentation	Student is able to create and analyze hydrogeological maps and cross-sections			[SU1] Assessment of task fulfilment		
	K6_W12	Student is familiar with mechanisms of groundwater formation and movement			[SW1] Assessment of factual knowledge		

Subject contents	<p>Lecture Groundwater in hydrogeological cycle. Groundwater occurrence, origin and age. Hydrogeological properties of soils and rocks. Groundwater flow. Groundwater chemistry. Groundwater contamination. Measurements and monitoring in groundwater. Management of groundwater resources.</p> <p>TUTORIALS Investigation of hydrogeological conditions on the basis of drilling results. Estimation of hydrogeological parameters based on soil granulometric curve. Interpretation of the results of steady state test pumpings. Interpretation of chemical groundwater analyses. Analysis of hydrogeological maps. Dewatering of an excavation. Evaluation test.</p>														
Prerequisites and co-requisites	knowledge of mathematics, basic hydrology and geology														
Assessment methods and criteria	<table border="1" data-bbox="448 360 1487 499"> <thead> <tr> <th data-bbox="448 360 794 398">Subject passing criteria</th> <th data-bbox="794 360 1141 398">Passing threshold</th> <th data-bbox="1141 360 1487 398">Percentage of the final grade</th> </tr> </thead> <tbody> <tr> <td data-bbox="448 398 794 427">Evaluation test for lectures</td> <td data-bbox="794 398 1141 427">60.0%</td> <td data-bbox="1141 398 1487 427">50.0%</td> </tr> <tr> <td data-bbox="448 427 794 456">Average note for projects</td> <td data-bbox="794 427 1141 456">60.0%</td> <td data-bbox="1141 427 1487 456">25.0%</td> </tr> <tr> <td data-bbox="448 456 794 499">Evaluation test for tutorials</td> <td data-bbox="794 456 1141 499">60.0%</td> <td data-bbox="1141 456 1487 499">25.0%</td> </tr> </tbody> </table>			Subject passing criteria	Passing threshold	Percentage of the final grade	Evaluation test for lectures	60.0%	50.0%	Average note for projects	60.0%	25.0%	Evaluation test for tutorials	60.0%	25.0%
Subject passing criteria	Passing threshold	Percentage of the final grade
