

关。GDAŃSK UNIVERSITY 多 OF TECHNOLOGY

Subject card

Subject name and code	Basics of Earth Science, PG_00058986							
Field of study	Environmental Engineering							
			Acadomic	loor of		2022	2024	
Date of commencement of studies	October 2023		Academic year of realisation of subject			2023/2024		
Education level	first-cycle studies		Subject group			Obligatory subject group in the field of study		
Mode of study	Part-time studies		Mode of delivery			at the university		
Year of study			Language of instruction			Polish		
Semester of study			ECTS credits			4.0		
Learning profile	general academic profile		Assessment form			exam		
Conducting unit	Department of Geotechnical and Hydraulic Engineering -> Faculty of Civil and Environmental Engineering							Engineering
Name and surname of lecturer (lecturers)	Subject supervisor	dr hab. Małgo	rzata Pruszkow	/ska-Ca	ceres			
	Teachers		dr hab. Małgorzata Pruszkowska-Caceres dr hab. inż. Beata Jaworska-Szulc					
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	t	Seminar	SUM
	Number of study hours	15.0	0.0	0.0	15.0		0.0	30
	E-learning hours inclu	ided: 0.0						
Learning activity and number of study hours	Learning activity	Participation ir classes includ plan				udy	SUM	
	Number of study hours	30		3.0		68.0		101
Subject objectives	Student gets acquainted with internal and external geological processes, their influence on abiotic environment of men; ability to interpret geological maps and cross-sections.							
Learning outcomes	Course outcome		Subject outcome			Method of verification		
			external geological processes; explains natural geological threats; interprets the influence of geological processes on the Earth's relief and mineral			[SW3] Assessment of knowledge contained in written work and projects [SW2] Assessment of knowledge contained in presentation [SW1] Assessment of factual knowledge		
	[K6_U04] can recognize basic rocks and minerals, can create and read maps and geological and hydrogeological sections; can read and interpret geological documentation		Student identifies and describes common rock forming minerals and common rocks – igneous,			[SU4] Assessment of ability to use methods and tools [SU1] Assessment of task fulfilment		
	documentation	ologicul	geological ma measurement	ps, cross-sections of layer orien	ons,			
Subject contents	Lecture: geological tir (volcanism, plutonism external processes (v	ne, the Earths of , metamorphis veathering, eros	geological ma measurement (the dip and th origin, the Eart m); plate tector sion, mass was	ps, cross-secti s of layer orien he strike). hs layers, basis hic theory; basi sting); glacial, s	ons, tation s of stra s of tect tream, i	tonics; i marine,	sostasy; the eolian proce	rock cycle; sses.
	Lecture: geological tir (volcanism, plutonism external processes (w Tutorials: minerals (d sedimentary, metamo geological maps anal	ne, the Earths of , metamorphis veathering, eros efinition, physic orphic rocks (ori ysis, geological	geological ma measurement (the dip and th origin, the Eart m); plate tector sion, mass was cal properties, of igin, mineral co	ps, cross-sections of layer orien ne strike). Ins layers, basis nic theory; basis nic theory; basis sting); glacial, s prigin, identificator proposition, text	ons, tation s of stra s of tect tream, i tion of t	tonics; i marine, pasic m	sostasy; the eolian proce inerals), igne	rock cycle; sses. ous,
Subject contents Prerequisites and co-requisites	Lecture: geological tir (volcanism, plutonism external processes (w Tutorials: minerals (du sedimentary, metamo	ne, the Earths of , metamorphis veathering, eros efinition, physic orphic rocks (ori ysis, geological	geological ma measurement (the dip and th origin, the Eart m); plate tector sion, mass was cal properties, of igin, mineral co	ps, cross-sections of layer orien ne strike). Ins layers, basis nic theory; basis nic theory; basis sting); glacial, s prigin, identificator proposition, text	ons, tation s of stra s of tect tream, i tion of t	tonics; i marine, pasic m	sostasy; the eolian proce inerals), igne	rock cycle; sses. ous,
Prerequisites and co-requisites Assessment methods	Lecture: geological tir (volcanism, plutonism external processes (w Tutorials: minerals (d sedimentary, metamo geological maps anal	ne, the Earths of , metamorphis veathering, eros efinition, physic orphic rocks (ori ysis, geological v level of second	geological ma measurement (the dip and th origin, the Eart m); plate tector sion, mass was cal properties, of gin, mineral co cross-section dary school	ps, cross-sections of layer orien ne strike). Ins layers, basis nic theory; basis nic theory; basis sting); glacial, s prigin, identificator proposition, text	ons, tation s of stra s of tect tream, i tion of t	tonics; i marine, pasic m assifica	sostasy; the eolian proce inerals), igne tion, identific	rock cycle; sses. ous,

Example issues/ example questions/ tasks being completed	Indicate geological events occuring at divergent plate boundaries					
	What are the main rock forming minerals of gabbro; indicate the stage of magma crystallization for this rock. Describe conditions of granite forming					
	What is the subduction zone ?					
	What are the main processes responsible for the Earth relief?					
Work placement	Not applicable
