

## Subject card

Subject name and code	New technologies of nanomaterials, PG_00061569						
Field of study	Nanotechnology						
Date of commencement of studies	February 2023		Academic year of realisation of subject		2023/2024		
Education level	second-cycle studies		Subject group		Optional subject group Subject group related to scientific research in the field of study		
Mode of study	Full-time studies		Mode of delivery		at the university		
Year of study	1		Language of instruction		Polish		
Semester of study	2		ECTS credits		2.0		
Learning profile	general academic profile		Assessment form		assessment		
Conducting unit	Zakład fizyki nanomateriałów -> Instytut Nanotechnologii i Inżynierii Materiałowej -> Faculty of Applied Physics and Mathematics						
Name and surname of lecturer (lecturers)	Subject supervisor		prof. dr hab. inż. Wojciech Sadowski				
	Teachers		prof. dr hab. inż. Wojciech Sadowski				
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	0.0	0.0	0.0	30.0	0.0	30
	E-learning hours included: 0.0						
	Additional information: <a href="https://enauczanie.pg.edu.pl/moodle/course/view.php?id=33616">https://enauczanie.pg.edu.pl/moodle/course/view.php?id=33616</a>						
	- lectures on the physico-chemical basis of nanomaterials production and new technological trends in the production of nanomaterials;  - preparation of a project regarding the development of technology for the production of nanomaterials;  - visit to the laboratories of leading research institutes related to nanotechnology						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	30		0.0		0.0	30
Subject objectives	The aim of the course is to familiarize students with the latest trends in nanomaterials technology.						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	K7_U05		Student is able to plan and conduct experimental research, critically analyze their results and draw conclusions.		[SU3] Assessment of ability to use knowledge gained from the subject		
	K7_U02		Student is able to plan and conduct experimental research, critically analyze their results and draw conclusions, providing students with the latest trends in nanomaterials technology.		[SU4] Assessment of ability to use methods and tools		
	K7_W04		Student has in-depth practical and theoretical knowledge of physical and chemical experimental methods of nanotechnology and materials science in general.		[SW2] Assessment of knowledge contained in presentation		
	K7_W02		Student has in-depth knowledge in the selected field of nanotechnology.		[SW1] Assessment of factual knowledge		

Subject contents	<p>lectures on the physico-chemical basis of nanomaterials production and new technological trends in the production of nanomaterials;</p> <p>preparation of a project regarding the development of technology for the production of nanomaterials;</p> <p>visit to the laboratories of leading research institutes related to nanotechnology.</p>		
Prerequisites and co-requisites	selection of the topic of M.Sc. thesis		
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	Design presentation	100.0%	70.0%
	Participation in lectures.	60.0%	30.0%
