

## Subject card

Subject name and code	Theory of Urbanism III, PG_00061545						
Field of study	Architecture						
Date of commencement of studies	October 2023		Academic year of realisation of subject		2025/2026		
Education level	first-cycle studies		Subject group		Obligatory subject group in the field of study Subject group related to scientific research in the field of study		
Mode of study	Full-time studies		Mode of delivery		at the university		
Year of study	3		Language of instruction		English		
Semester of study	5		ECTS credits		1.0		
Learning profile	general academic profile		Assessment form		exam		
Conducting unit	Department Of Urban Design And Regional Planning -> Faculty Of Architecture -> Wydziały Politechniki Gdańskiej						
Name and surname of lecturer (lecturers)	Subject supervisor						
	Teachers						
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	0.0	0.0	0.0	0.0	15
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	15		1.0		9.0	25
Subject objectives	The aim of the subject is to familiarize students with the basic issues of contemporary urban planning, including the problems of transforming downtown structures.						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	[K6_W06] knows and understands the nature of the architect's profession and its role in society; main principles of professional presentation of architectural and urban concepts		knows and understands the nature of the architect's profession and its role in society; main principles of professional presentation of architectural and urban concepts		[SW1] Assessment of factual knowledge		
	[K6_W03] knows and understands history and theory of architecture as well as art, technology and humanities to the extent necessary for the proper performance of architectural designs; issues related to architecture and urban planning useful for the design of architectural objects and urban complexes in the context of social, cultural, natural, historical, economic, legal and other non-technical conditions of engineering activities, integrating knowledge acquired during studies;		knows and understands history and theory of architecture to the extent necessary for the proper performance of architectural designs; issues related to architecture and urban planning useful for the design of architectural objects and urban complexes in the context of social, cultural, natural, historical, economic, legal and other non-technical conditions of engineering activities, integrating knowledge acquired during studies;		[SW1] Assessment of factual knowledge		

Subject contents	Introduction to the basic trends and definitions used in the practice of designing public spaces. Functional areas of public space. In addition, the subject introduces issues related to the functioning of the downtown city at night and the activation of the city center after dark. Contemporary housing issues in the context of downtown areas. Neighborhood planning process - shaping the quality of life in the context of global development		
Prerequisites and co-requisites			
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	Score from the final exam	60.0%	100.0%
Recommended reading	Basic literature	1. Gehl J., Życie między budynkami, wyd. RAM, Kraków , 2013 2. Lorens P. Martyniuk-Pęczek J., Problemy kształtowania przestrzeni publicznych, Wyd.
