

。 GDAŃSK UNIVERSITY OF TECHNOLOGY

Subject card

Ő.									
Subject name and code	Theory of urbanism IV, PG_00061557								
Field of study	Architecture								
Date of commencement of studies	October 2023		Academic year of realisation of subject			2025/2026			
Education level	first-cycle studies		Subject group			Obligatory subject group in the field of study Subject group related to scientific research in the field of study			
Mode of study	Full-time studies		Mode of delivery			at the university			
Year of study	3		Language of instruction			English			
Semester of study	6		ECTS credits			1.0			
Learning profile	general academic profile		Assessment form			exam			
Conducting unit	Department Of Urban Design And Regional Planning -> Faculty Of Architecture -> Wydziały Politechniki Gdańskiej								
Name and surname	Subject supervisor								
of lecturer (lecturers)	Teachers			-

	Number of study hours	15		1.0		9.0		25	
Subject objectives	To acquaint students with the problems of planning and designing the development of complex urban organisms, taking into account the existing conditions and potentials, tested on various scales. Transfer of knowledge related to systemic and integrated planning and urban design of multifunctional urban complexes. Transfer of knowledge about the latest challenges, requirements and trends in urban planning. Outlining the basics of spatial planning on a commune scale.								

Learning outcomes	Course outcome	Subject outcome	Method of verification	
	[K6_W03] knows and understands history and theory of architecture as well as art, technology and humanities to the extent necessary for the proper performance of architectural designs; issues related to architecture and urban planning useful for the design of architectural objects and urban complexes in the context of social, cultural, natural, historical, economic, legal and other non- technical conditions of engineering activities, integrating knowledge acquired during studies.	The student has a basic knowledge of the features and functional and spatial structure of the city. He knows the main conditions and principles of shaping urban structures in the spirit of sustainable development. Distinguishes contemporary phenomena, problems and trends in urban development. Has a basic knowledge of spatial planning in the city.	[SW1] Assessment of factual knowledge	
	[K6_W04] knows and understands relations between man and architecture and between architecture and the surrounding environment, and the need to adapt architecture to human needs and scale; problems of physics, technology and functions of buildings to the extent that ensures comfort of use and protection against the effects of weather; methods and means of implementing environmentally responsible sustainable design as well as protection and conservation of the surrounding environment	The student has basic knowledge of the complexity of the relationship between the environment and the development of spatial and urban development and in terms of the need to take into account environmental conditions in urban planning, as well as the need of sustainable design and environmental protection.	[SW1] Assessment of factual knowledge	
Subject contents	The course covers Theory of Urban about the theoretical foundations of complex urban structures on various They learn basic information about s	Design IV (lectures, 15 hours). As paurban planning and the challenges, passcales, with the need for a systemic spatial planning at the commune level	art of the lectures, students will learn problems and trends in designing and interdisciplinary approach. I.
