

## Subject card

Subject name and code	CAD. Introduction, PG_00055858								
Field of study	Architecture								
Date of commencement of studies	October 2023		Academic year of realisation of subject			2023/2024			
Education level	first-cycle studies		Subject group			Obligatory subject group in the field of study			
Mode of study	Full-time studies		Mode of delivery			at the university			
Year of study	1		Language of instruction			English			
Semester of study	1		ECTS credits			2.0			
Learning profile	general academic profile		Assessment form		assessment				
Conducting unit	Department of Visual Techniques -> Faculty of Architecture								
Name and surname	Subject supervisor	mgr inż. arch. Dariusz Cyparski							
of lecturer (lecturers)	Teachers		mgr inż. arch. Dariusz Cyparski						
Lesson types and methods	Lesson type	Lecture	Tutorial	Laboratory	Projec	:t	Seminar	SUM	
of instruction	Number of study hours	0.0	0.0	30.0	0.0		0.0	30	
	E-learning hours included: 0.0								
Learning activity and number of study hours	Learning activity Participation i classes including plan				Self-study S		SUM		
	Number of study hours	30		4.0		16.0		50	
Subject objectives	The program aims to design documentation							rams to create	
Learning outcomes	Course outcome		Subject outcome			Method of verification			
	[K6_U01] is able to use the experience gained during studies to critically analyze the conditions and formulate conclusions for design in an interdisciplinary context		Has practical skills in creating and editing vector graphics and raster images. Can select appropriate computer tools and graphic resources for a design task.			[SU4] Assessment of ability to use methods and tools			
	[K6_U03] is able to prepare a graphic, written and oral presentation of your own design concepts in the field of architecture and urban planning, meeting the requirements of a professional record appropriate for architectural and urban design		The student uses graphic computer programs to create models and planar representations of three-dimensional objects in order to present the results of the design process.			[SU5] Assessment of ability to present the results of task [SU1] Assessment of task fulfilment			

Data wydruku: 13.05.2024 04:41 Strona 1 z 2

Subject contents	The application of computer graphic	s in architectural design				
	Creation of digital spatial models in SketchUp:					
	- creation, modifications and transformations of geometric objects					
	- navigation in virtual space and defining parallel and perspective views					
	2. Creating visualizations of architectural objects based on digital models  - the use of materials library and components  3. Creating technical vector drawings in AutoCAD  - digital drawing management - properties, styles, layers, blocks, groups, etc.  - printing to the scale					
	Creating complex digital documents					
	- combining vector drawings, raster images and text					
Prerequisites and co-requisites	IT knowledge at the secondary scho	ool level				
	0.11.1.11.11.11					
Assessment methods	Subject passing criteria	Passing threshold	Percentage of the final grade			
Assessment methods and criteria	Subject passing criteria substantive and graphical correctness of practical exercises	Passing threshold 100.0%	Percentage of the final grade 100.0%			
	substantive and graphical		100.0%			
and criteria	substantive and graphical correctness of practical exercises	1. Course materials: https://enaucza	anie.pg.edu.pl/moodle/course/
