

## Subject card

Subject name and code	, PG_00058696						
Field of study	Materials Engineering, Materials Engineering						
Date of commencement of studies	February 2024	Academic year of realisation of subject			2023/2024		
Education level	second-cycle studies	Subject group			Optional subject group Subject group related to scientific research in the field of study		
Mode of study	Full-time studies	Mode of delivery			at the university		
Year of study	1	Language of instruction			Polish		
Semester of study	1	ECTS credits			2.0		
Learning profile	general academic profile	Assessment form			assessment		
Conducting unit	Department of Polymers Technology -> Faculty of Chemistry						
Name and surname of lecturer (lecturers)	Subject supervisor	prof. dr hab. inż. Janusz Datta					
	Teachers	dr inż. Marcin Włoch prof. dr hab. inż. Janusz Datta					
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	0.0	15.0	0.0	0.0	30
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours		Self-study	SUM	
	Number of study hours	30	5.0		15.0	50	
Subject objectives	Familiarization with the essence of the design process of industrial plastics. Understanding the rules of creating process and technology projects. Familiarization with the operation and selection of equipment at Industrial engineering plastics. Understanding the production lines of major bulk plastics artificial. Understanding the principles of operation and control of industrial installations						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	K7_U01		Knows the operation of selected devices at industrial installations		[SU2] Assessment of ability to analyse information		
	K7_W04		Knows the way of designing industrial installations for the plastic technical articles production		[SW2] Assessment of knowledge contained in presentation		
	K7_W03		Knows the ways of monitoring of industrial installations		[SW2] Assessment of knowledge contained in presentation		
Subject contents	The essence of design processes The concept of chemical and technological processes Selected achievements and development trends of modern industrial engineering plastics Management Systems production quality Issues of industrial property protection						
Prerequisites and co-requisites	General knowledge of polymer materials. Know equipment and machines used in the plastics industry artificial. Fundamentals of mass and heat balancing.						
Assessment methods and criteria	Subject passing criteria		Passing threshold		Percentage of the final grade		
	discussion, report		50.0%		50.0%		
	written test		50.0%		50.0%

	eResources addresses	<p>Adresy na platformie eNauczanie:</p> <p>Inżynieria przemysłowa tworzyw sztucznych (PG_00058696) - WYKŁAD / LABORATORIUM - 2024 - Moodle ID: 38103  <a href="https://enauczanie.pg.edu.pl/moodle/course/view.php?id=38103">https://enauczanie.pg.edu.pl/moodle/course/view.php?id=38103</a></p>
Example issues/ example questions/ tasks being completed	<p>Present the diagram Industrial installation for PVC production using the suspension polymerization method and discuss its operation. Industrial installation for PUR production - present the main elements of the installation. What analytical techniques can be used to control the polymer production process (at its various stages)</p>	
Work placement	<p>Not applicable</p>
