

## Subject card

Subject name and code	, PG_00058697						
Field of study	Materials Engineering, Materials Engineering						
Date of commencement of studies	February 2024		Academic year of realisation of subject		2024/2025		
Education level	second-cycle studies		Subject group		Optional subject group Subject group related to scientific research in the field of study		
Mode of study	Full-time studies		Mode of delivery		at the university		
Year of study	1		Language of instruction		Polish		
Semester of study	2		ECTS credits		5.0		
Learning profile	general academic profile		Assessment form		exam		
Conducting unit	Department Of Polymer Technology -> Faculty Of Chemistry -> Wydziały Politechniki Gdańskiej						
Name and surname of lecturer (lecturers)	Subject supervisor		prof. dr hab. inż. Janusz Datta				
	Teachers		dr inż. Paulina Parcheta-Szwindowska  prof. dr hab. inż. Janusz Datta  dr hab. inż. Michał Strankowski				
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	30.0	0.0	30.0	0.0	0.0	60
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	60		5.0		60.0	125
Subject objectives	Indication of work on a database of polymeric construction materials for the choice of optimal material and method of production of the technical product, stress analysis and creating technical elements at engineering drawings.						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	K7_K02		Learns the datebases of raw materials in terms of choosing the optimal material Can choose the polimer material to a product;		[SK4] Assessment of communication skills, including language correctness		
	K7_U03		Learns about the methods of choosing a polymer material for technical constructions		[SU3] Assessment of ability to use knowledge gained from the subject		
	K7_W01		Prepares drawings of individual elements a selected construction made of polymeric material		[SW2] Assessment of knowledge contained in presentation		
	K7_U04		Get to know polymeric construction materials, learn about layered constructions and their technical applications		[SU1] Assessment of task fulfilment		
	K7_W06		Analyzes the figures of selection material. Calculates strength of product made of selected polymeric material		[SW3] Assessment of knowledge contained in written work and projects		
Subject contents	Review of construction polymeric materials. Definition of property of engineering materials. Mechanical proprieties: critical coefficient intensities of tensions, logarithmic dekrement suppressions, coefficient of fatigue. Thermal proprieties: thermal conductivity, heat capacity, glass transition temperaure, melting temperature, resistance to thermal shocks, coefficient of leveling of temperature. Hysteresis. Ways of presentations of properties of construction materials. Graphs of selection of material: Young Module-Density, Tensile Strength Density, Young Module Tensile Strength & others. Functionality coefficients with regarding of shape.. Methods of production and design. Production method influence on product design.Overview of polymeric structural materials.						

Prerequisites and co-requisites	General knowledge of polymeric materials. Basic knowledge of material strength and of technical drawing		
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	tests + raports	50.0%	50.0%
	test	50.0%	50.0%
Recommended reading	Basic literature	1)Ashby M.F., Dobór materiałów w projektowaniu inżynierskim, WNT, Warszawa 1998  2)Żuchowska D., Polimery konstrukcyjne, WNT, Warszawa 1995.  3)Ward J.M., Mechaniczne własności polimerów jako tworzyw konstrukcyjnych, PWN, Warszawa 1975.	
	Supplementary literature	Poradnik: Konstrukcje z tworzyw sztucznych, WEKA Sp.z.o.o.,Warszawa 2000.	
	eResources addresses	Adresy na platformie eNauczanie: Polimerowe materiały konstrukcyjne (PG_00058697) - WYKŁAD + LABORATORIUM - 2024/2025 - Moodle ID: 40463 <a href="https://enauczanie.pg.edu.pl/moodle/course/view.php?id=40463">https://enauczanie.pg.edu.pl/moodle/course/view.php?id=40463</a>	
Example issues/ example questions/ tasks being completed	1. How are polymer-metal structures called SPSs made?  2. In what circumstances are structural material selection charts used?  3. List the methods of manufacturing tanks from: (a) thermoplastics, (b) duroplastics  4. On what basis are the functional requirements used to select a polymer material for a product determined?		
Work placement	Not applicable		

Document generated electronically. Does not require a seal or signature.
