

Subject card

Subject name and code	Fundamentals of Machinery and Equipment Technical Operation , PG_00044604						
Field of study	Transport						
Date of commencement of studies	October 2023	Academic year of realisation of subject				2024/2025	
Education level	first-cycle studies	Subject group				Obligatory subject group in the field of study Subject group related to scientific research in the field of study	
Mode of study	Full-time studies	Mode of delivery				at the university	
Year of study	2	Language of instruction				Polish	
Semester of study	4	ECTS credits				3.0	
Learning profile	general academic profile	Assessment form				assessment	
Conducting unit	Department of Machine Design and Vehicles -> Faculty of Mechanical Engineering and Ship Technology						
Name and surname of lecturer (lecturers)	Subject supervisor		dr hab. inż. Piotr Mioduszewski				
	Teachers		dr hab. inż. Piotr Mioduszewski				
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	15.0	0.0	0.0	0.0	30
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	30		5.0		40.0	75
Subject objectives	To provide basic knowledge about the operation of machines on the example of motor vehicles.						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	[K6_U11] able to describe and assess critically the design of basic means of transport and systems of transport, able to select methods for organising their technical operation		Student is able to describe automotive facilities used in the process of vehicle operation		[SU5] Assessment of ability to present the results of task		
	[K6_K01] able to think and act creatively and enterprisingly; able to define priorities to support the delivery of an individual or group task; understands the need for continuous education and taking responsibility as a professional for their work and the work of the team		Student describes operation of main motor vehicle systems and units		[SK1] Assessment of group work skills		
	[K6_W13] has basic knowledge of the construction, operation and diagnostics of means of transport and the relevant methods, tools and materials		The student has knowledge on selected issues concerning the operation of motor vehicles		[SW1] Assessment of factual knowledge		
Subject contents	Machine and device operation: basic definitions. Basics of maintenance theory. Utilisation of machines and devices. Utilisation of motor vehicles. Utilisation processes - classification. Vehicle operation systems. Transport process. Technic-economic indicators. Choise of optimal transport. Basic wear processes in maintenance. Accelerating wear factors and prevention. Influence od utilisation and service conditions. Service and repair systems. Clasification of services. Maintenance materials. Fuels, oils, greases. Conservation materials. Maintenance fluids. Vehicle tyres. Technical back-up facilities. Organisation of technical back-up facilities of motorisation.						
Prerequisites and co-requisites	Knowledge of mechanics of machines and devices. Basic knowledge of machine building and mechanical engineering. Knowledge of building and principles of operation of systems and units in motor vehicles.						
Assessment methods and criteria	Subject passing criteria		Passing threshold		Percentage of the final grade		
	Presentation		100.0%		30.0%		
	Test		50.0%		70.0%		

Recommended reading	Basic literature	K. Abramek, M. Uzdowski: Pojazdy samochodowe. Podstawy obsługi i napraw, WKiŁ, Warszawa M. Uzdowski, K. Abramek, K. Garczyński: Pojazdy samochodowe. Eksploatacji techniczna i naprawa, WKiŁ, Warszawa S. Orzełowski: Naprawa i obsługa pojazdów samochodowych. WSiP, Warszawa A. Maryański: Stacje obsługi samochodów, WKiŁ, Warszawa J. Michałowska: Paliwa, oleje i smary, WKiŁ Warszawa
	Supplementary literature	M. Hebda, T Mazur: Podstawy eksploatacji pojazdów samochodowych, WKiŁ, Warszawa J. Cypko, E. Cypko: Podstawy technologii i organizacji naprawy pojazdów mechanicznych, WKiŁ, Warszawa J. Janecki, S. Gołąbek, Zużycie części i zespołów pojazdów samochodowych, WKiŁ, Warszawa.
