Learning outcomes	Course outcome		Subject outcome			Method of verification			
	group, field and field surveying surveys		Student performs geodetic measurements Student prepares basic geodetic documentation regarding levelling traverse, polygon traverse and survey of details.			[SU2] Assessment of ability to analyse information [SU4] Assessment of ability to use methods and tools [SU1] Assessment of task fulfilment			
	[K6_U13] is able to apply the principles of health and safety at work during the execution of geodetic works		The student is able to apply the principles of safe surveying and usage, transfer and storage of surveying instruments.			[SU1] Assessment of task fulfilment			
	[K6_W06] has a well-grounded knowledge and understands geodesy concepts including the main methods of obtaining data about space togather with the surveying and computional methods, which from the one hand are compatible with the current legal status and from the other hand refer to measurements on the plane and cover the use of modern geodetic instruments, with taking into account the curvature of the Earth and the impact of gravity on the maner of measurements and results		The student possess the knowledge and uses the information concerning the performance of basic geodetic measurements and calculations.			[SW1] Assessment of factual knowledge [SW3] Assessment of knowledge contained in written work and projects
