

Subject card

| | | | | | | | |
|---|---|---|-------------------------------------|------------|--|---------|-----|
| Subject name and code | Protection of the atmosphere and the climate, PG_00061704 | | | | | | |
| Field of study | Recycling and Energy Recovery | | | | | | |
| Date of commencement of studies | October 2023 | Academic year of realisation of subject | | | 2023/2024 | | |
| Education level | first-cycle studies | Subject group | | | Obligatory subject group in the field of study Subject group related to scientific research in the field of study | | |
| Mode of study | Full-time studies | Mode of delivery | | | at the university | | |
| Year of study | 1 | Language of instruction | | | Polish Polish | | |
| Semester of study | 2 | ECTS credits | | | 1.0 | | |
| Learning profile | general academic profile | Assessment form | | | assessment | | |
| Conducting unit | Department of Environmental Engineering Technology -> Faculty of Civil and Environmental Engineering | | | | | | |
| Name and surname of lecturer (lecturers) | Subject supervisor | dr inż. Magda Kasprzyk | | | | | |
| | Teachers | mgr inż. Alicja Kupczyk dr inż. Magda Kasprzyk | | | | | |
| Lesson types and methods of instruction | Lesson type | Lecture | Tutorial | Laboratory | Project | Seminar | SUM |
| | Number of study hours | 10.0 | 10.0 | 0.0 | 0.0 | 0.0 | 20 |
| | E-learning hours included: 0.0 | | | | | | |
| Learning activity and number of study hours | Learning activity | Participation in didactic classes included in study plan | Participation in consultation hours | | Self-study | | SUM |
| | Number of study hours | 20 | 1.0 | | 4.0 | | 25 |
| Subject objectives | The aim of the course is to provide an introduction to the principles of atmospheric protection, emissions and the challenges posed by climate change. | | | | | | |
| Learning outcomes | Course outcome | Subject outcome | | | Method of verification | | |
| | [K6_W02] analyzes engineering and technological issues and problems in the area of raw materials and energy recovery using appropriate and appropriate analytical, numerical and experimental tools and methods | The student analyses engineering and technological issues and problems in the area of resource and energy recovery using appropriate and relevant analytical, numerical and experimental tools and methods. | | | [SW3] Assessment of knowledge contained in written work and projects [SW1] Assessment of factual knowledge | | |
| | [K6_K03] is committed to independent lifelong learning and independently follows the development of science and technology, especially in the area of recycling raw materials and energy. | The student engages in independent lifelong learning and independently follows developments in science and technology, especially in the area of resource and energy recovery. | | | [SK4] Assessment of communication skills, including language correctness [SK2] Assessment of progress of work | | |
| | [K6_U02] solves engineering issues and problems in the area of raw materials and energy recovery through the use of appropriate analytical, numerical and experimental tools and methods. | The student solves engineering issues and problems in the area of resource and energy recovery by applying appropriate and relevant analytical, numerical and experimental tools and methods. | | | [SU2] Assessment of ability to analyse information [SU4] Assessment of ability to use methods and tools | | |
| Subject contents | 1. The atmosphere (composition and properties of the air, vertical structure of the atmosphere). Types, causes and sources of atmospheric air pollution. Human activity as a source of greenhouse gas emissions. 2.State of air quality in Poland and Europe. 3.Changes in climate of anthropogenic origin. 4.Main effects of climate change. Negative impact on the ocean. 5.Climate extremes and the effects on humans. | | | | | | |
| Prerequisites and co-requisites | | | | | | | |

| Assessment methods and criteria | Subject passing criteria | Passing threshold | Percentage of the final grade |
|--|---|---|-------------------------------|
| | | 60.0% | 50.0% |
| | | 60.0% | 50.0% |
