

Subject card

Subject name and code	Monitoring and Analytical Environmental Pollution, PG_00019320										
Field of study	Chemistry in Construction Engineering										
Date of commencement of studies	October 2023	Academic year of realisation of subject		2024/2025							
Education level	first-cycle studies		Subject group		Obligatory subject group in the field of study	Subject group related to scientific research in the field of study					
Mode of study	Full-time studies		Mode of delivery		at the university						
Year of study	2	Language of instruction		Polish							
Semester of study	4	ECTS credits		6.0							
Learning profile	general academic profile		Assessment form		exam						
Conducting unit	Department of Analytical Chemistry -> Faculty of Chemistry										
Name and surname of lecturer (lecturers)	Subject supervisor		dr hab. inż. Marek Tobiszewski								
	Teachers										
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM				
	Number of study hours	30.0	0.0	30.0	0.0	15.0	75				
	E-learning hours included: 0.0										
Address on the e-learning platform: https://enauczanie.pg.edu.pl/moodle/course/view.php?id=4431											
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM				
	Number of study hours	75		5.0		70.0	150				
Subject objectives	Gaining knowledge of environmental monitoring and analysis										
Learning outcomes	Course outcome		Subject outcome			Method of verification					
	K6_K05		understands issues related to environmental quality and environmental analytics			[SK4] Assessment of communication skills, including language correctness					
	K6_U01		is able to use different sources of knowledge			[SU2] Assessment of ability to analyse information					
	K6_W08		has knowledge on techniques of monitoring of environmental quality			[SW1] Assessment of factual knowledge					
Subject contents	Lecture: Different topics from modern chemical analysis										
	Laboratory: Application of variety of analytical protocols to determine environmental pollutants										
	Seminar: Presentation of the main ideas of scientific papers										
Prerequisites and co-requisites	Knowledge from Analytical Chemistry										
Assessment methods and criteria	Subject passing criteria		Passing threshold		Percentage of the final grade						
	examination		60.0%		50.0%						
	laboratory tests		50.0%		30.0%						
presentation assessment		60.0%		20.0%

	eResources addresses	Adresy na platformie eNauczanie:
	Why extraction is performed before final determination? What is the goal of environmental tracers application? Give examples of environmental tracers. What requirements should it meet? What are processes that lead to loss of liquid sample representativeness. What are the measures to avoid them? What is speciation analysis? Explain terms: group speciation, individual speciation, screening speciation and physical speciation. Give examples. What are advantages of total parameters application over more traditional approach to monitoring?	
	What are advantages of biomonitoring over more traditional approach to monitoring?
