

Subject card

Subject name and code	Road construction and maintenance, PG_00044343						
Field of study	Civil Engineering						
Date of commencement of studies	October 2023		Academic year of realisation of subject		2024/2025		
Education level	second-cycle studies		Subject group		Optional subject group		
Mode of study	Part-time studies		Mode of delivery		at the university		
Year of study	2		Language of instruction		Polish		
Semester of study	3		ECTS credits		2.0		
Learning profile	general academic profile		Assessment form		assessment		
Conducting unit	Department of Transportation Engineering -> Faculty of Civil and Environmental Engineering						
Name and surname of lecturer (lecturers)	Subject supervisor		dr inż. Bohdan Dołżycki				
	Teachers						
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	10.0	0.0	0.0	10.0	0.0	20
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	20		5.0		25.0	50
Subject objectives	The course presents principles of road construction and maintenance, in terms of technical and legal requirements.						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	[K7_U08] Is able to evaluate technical conditio of a road, to design its pavement and choose proper construction technology using mechanistic methods and material investigations		At the conclusion of the course, student should be familiar with the methods of road condition assessment and proper maintenance techniques.		[SU2] Assessment of ability to analyse information [SU3] Assessment of ability to use knowledge gained from the subject [SU4] Assessment of ability to use methods and tools		
	[K7_W07] has expanded knowledge of theory of road and airport pavements, pavement maintenance, advanced methods of material testing and contruction technologies		At the conclusion of the course, student should be familiar with the principles of road construction and maintenance, including modern construction and diagnostic technologies.		[SW1] Assessment of factual knowledge		
Subject contents	Lecture contents: Formal regulations regarding to road construction process, order of construction process, road construction technologies, road diagnostic and maintenance. Project contents: Designing of the section of the road including drainage, sighting distance and structural overlay.						
Prerequisites and co-requisites	Prerequisites (basic): 1. Course - Bridge Construction (BND012) 2. Course - Railway Construction II (BND013) 3. Course - Road and Motorway Construction II (BND042)						

Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	Practical design exercise	100.0%	50.0%
	Colloquium at the end of the term	60.0%	50.0%
