

Subject card

Subject name and code	Modern Wooden Structures, PG_00044330						
Field of study	Civil Engineering						
Date of commencement of studies	October 2023	Academic year of realisation of subject			2024/2025		
Education level	second-cycle studies	Subject group			Optional subject group Subject group related to scientific research in the field of study		
Mode of study	Part-time studies	Mode of delivery			at the university		
Year of study	2	Language of instruction			Polish		
Semester of study	3	ECTS credits			3.0		
Learning profile	general academic profile	Assessment form			assessment		
Conducting unit	Department of Building Structures and Material Engineering -> Faculty of Civil and Environmental Engineering						
Name and surname of lecturer (lecturers)	Subject supervisor	dr inż. Mateusz Sondej					
	Teachers	dr inż. Mateusz Sondej					
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	10.0	0.0	0.0	0.0	25
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours		Self-study		SUM
	Number of study hours	25	5.0		45.0		75
Subject objectives	Acquiring knowledge in the construction of residential and communal buildings as well as the basics of designing buildings and construction as well as managing construction; acquainting with technologies, principles and organization of construction, computer techniques and modern technologies; developing the ability to identify significant problems in the construction industry; preparing the graduate for work as independent as well as in a team and education at the second level of studies.						
Learning outcomes	Course outcome	Subject outcome			Method of verification		
	[K7_W10] knows modern building materials as well as technologies and methods of its manufacturing and production of construction elements	The student knows the currently used building materials as well as the technologies and principles of industrial production of building materials and elements.					
	[K7_U15] has advanced skills in civil engineering within offered specialization/profile	The student has advanced skills in the field of construction within the offered specialties and diploma profiles.			[SU2] Assessment of ability to analyse information		
	[K7_W15] has deep and adequate knowledge of civil engineering, within offered specialization and profile	The student has structured and in-depth knowledge in the field of construction within the offered specialties and diploma profiles.			[SW1] Assessment of factual knowledge		
Subject contents	Wood as a building material. Ecological aspects of the use of wood. Wood species, timber production, sawn timber defects, timber range, sorting and strength grades of wood. Wood materials. Protection of wood against fire, biological corrosion and insects. Structural elements made of glued wood. Fasteners in wooden constructions. Connection design. Ceiling and roof trusses. Systems and technologies used in wooden constructions (mullion-transom and skeletal structures).						
Prerequisites and co-requisites	Completing the General Construction course.						
Assessment methods and criteria	Subject passing criteria	Passing threshold			Percentage of the final grade		
	Test	60.0%			50.0%		
	Semester assignment	60.0%			50.0%
