

Subject card

Subject name and code	Quality of Electric Energy (PQ I), PG_00041817						
Field of study	Electrical Engineering						
Date of commencement of studies	October 2020		Academic year of realisation of subject		2023/2024		
Education level	first-cycle studies		Subject group				
Mode of study	Part-time studies		Mode of delivery		at the university		
Year of study	4		Language of instruction		Polish		
Semester of study	7		ECTS credits		3.0		
Learning profile	general academic profile		Assessment form		assessment		
Conducting unit	Department of Power Electronics and Electrical Machines -> Faculty of Electrical and Control Engineering						
Name and surname of lecturer (lecturers)	Subject supervisor		dr hab. inż. Jarosław Łuszcz				
	Teachers						
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	20.0	0.0	10.0	0.0	0.0	30
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	30		4.0		41.0	75
Subject objectives	Presentation of the basic issues related to the quality of electricity in an industrial environment.						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	K6_U09		Ability to select electrical equipment to assess the power quality.		[SU1] Assessment of task fulfilment		
	K6_K01		Knowledge of sources of specialistknowledge extending the scope ofthe course content.		[SK5] Assessment of ability to solve problems that arise in practice		
	K6_W10		knows the basics of processing, use and rational use of electricity		[SW1] Assessment of factual knowledge		
	K6_W11		The ability to take into account therequirements of the power qualityin the design of electrical installations.		[SW2] Assessment of knowledge contained in presentation		
	K6_U10		The ability to take into account therequirements of the power qualityin the design of electrical installations.		[SU3] Assessment of ability to use knowledge gained from the subject		
	K6_W09		Ability to take into account the requirements of power quality in power design.		[SW3] Assessment of knowledge contained in written work and projects		
	K6_U05		Ability to provide first aid in emergencies.		[SU1] Assessment of task fulfilment		
	K6_K05		He can organize work in accordance with the principles of safety rules.		[SK3] Assessment of ability to organize work		
Subject contents	Power quality indices. Standardization requirements. Reasons for the degradation of energy quality. Sources of harmonic distortions. The effects of poor energy quality.						
Prerequisites and co-requisites							
Assessment methods and criteria	Subject passing criteria		Passing threshold		Percentage of the final grade		
	Assesment of report		60.0%		50.0%		
	Task realization assesment		60.0%		50.0%
