

Subject card

Subject name and code	, PG_00061833						
Field of study	Management and Production Engineering						
Date of commencement of studies	February 2023		Academic year of realisation of subject		2023/2024		
Education level	second-cycle studies		Subject group				
Mode of study	Full-time studies		Mode of delivery		at the university		
Year of study	2		Language of instruction		Polish		
Semester of study	3		ECTS credits		4.0		
Learning profile	general academic profile		Assessment form		assessment		
Conducting unit	Zakład Materiałoznawstwa I Technologii Materiałowych -> Institute of Manufacturing and Materials Technology -> Faculty of Mechanical Engineering and Ship Technology						
Name and surname of lecturer (lecturers)	Subject supervisor		prof. dr hab. inż. Dionizy Czekaj				
	Teachers						
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	30.0	0.0	15.0	0.0	0.0	45
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	45		0.0		0.0	45
Subject objectives	To introduce students with the mathematical foundations and selected applications of game theory, especially for solving conflict situations or cooperation.						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	[K7_W01] knows and understands to a greater extent selected issues in the field of management and quality sciences and mechanical engineering, their location in the field of social sciences and engineering and technical sciences, as well as relationships with related disciplines, and sees the possibility of applying the knowledge in practice.		The student knows and understands selected issues in the field of management and quality science as well as mechanical engineering.		[SW1] Assessment of factual knowledge		
	[K7_K02] is aware of the importance and understanding of non-technical aspects and effects of engineering activities, including its impact on the environment, and the related responsibility for decisions made demonstrates knowledge of actions to reduce risk and anticipate the social impact of engineering and manufacturing activities		The student is aware of the non-technical aspects and effects of engineering activities.		[SK2] Assessment of progress of work		
	[K7_K01] is aware of the need to expand knowledge and verify the methods of solving problems by consulting experts		The student understands the need to expand their knowledge.		[SK2] Assessment of progress of work		
	[K7_U01] can obtain information from literature, databases and others sources, also in English or another foreign language recognized as the language of international communication in a given engineering discipline; is able to integrate the obtained information, interpret it, as well as draw conclusions and formulate and justify opinions.		The student is able to obtain information from literature, databases and other sources, also in English.		[SU4] Assessment of ability to use methods and tools		

Subject contents	Introduction. Game examples. Nominal form games and dominated strategies. Nash equilibrium. Equilibrium in mixed strategies. Extensive character of the game. Repeated games. Evolution Games. Cooperative games. Elements of game learning theory.		
Prerequisites and co-requisites			
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	Laboratory classes	100.0%	50.0%
	Final test	51.0%	50.0%
