|   | K7_U02   |   | The student prepares and discusses issues from a given thematic area. Preparation is able to present information in a synthetic way. |                                     |                               | [SU2] Assessment of ability to analyse information   |                        |     |  |
|   | K7_U03   |   |  |                                     |                               | [SU4] Assessment of ability to use methods and tools |                        |     |  |
| Subject contents                            | LECTURES: Generator as a regulated object. Generator controllers, limits of operation points for synchronic generators. Influence of automatic control of a tap changing step-up transformer on power capability area of generating unit. Connecting electric power subsystems to parallel running after system breakdown. Defining limits of criterial parameters. Relations between basic electric parameters in power grid. Protective Automatic: under-frequency load shedding systems, under-voltage load shedding systems.  CLASSES: Coupling parameters of simple power grid model elements (generators, transformers, power lines) to conduct research including various load level in modelled power grid. Calculating load flow. Characterizating dependencies of voltage and/or transformer tap controllers on voltage levels and load flow in analised grid. |   |  |                                     |                               |  |                        |     |  |
| Prerequisites and co-requisites             | Knowledge of basic electrotechnics Knowledge of basic electrical machinery Knowledge of basic electroenergetics  |   |  |                                     |                               |  |                        |     |  |
| Assessment methods                          | Subject passing criteria   |   | Passing threshold  |                                     | Percentage of the final grade |  |                        |     |  |
| and criteria                                | Midterm colloquium   |   | 50.0%  |                                     |                               | 100.0%   |                        |     |  |
