

Subject card

Subject name and code	Control Systems with Signal Processors, PG_00044091						
Field of study	Electrical Engineering						
Date of commencement of studies	February 2023		Academic year of realisation of subject		2023/2024		
Education level	second-cycle studies		Subject group				
Mode of study	Full-time studies		Mode of delivery		at the university		
Year of study	1		Language of instruction		Polish		
Semester of study	2		ECTS credits		2.0		
Learning profile	general academic profile		Assessment form		assessment		
Conducting unit	Department of Controlled Electric Drives -> Faculty of Electrical and Control Engineering						
Name and surname of lecturer (lecturers)	Subject supervisor		dr inż. Filip Wilczyński				
	Teachers		dr inż. Filip Wilczyński				
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	0.0	15.0	0.0	0.0	30
	E-learning hours included: 0.0						
	Address on the e-learning platform: https://enauczanie.pg.edu.pl/moodle/course/view.php?id=17244						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	30		5.0		15.0	50
Subject objectives	Tha main aim of the subject is to introduce implementation methods of control systems using current microprocessor systems.						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	K7_W02		student can implement a control system using an analog-digital converter to measure plant's outputs		[SW3] Assessment of knowledge contained in written work and projects		
	K7_U02		student can explain proposed control system and present the results		[SU5] Assessment of ability to present the results of task		
	K7_W01		student can prepare a mathematical model of the plant and can numerically solve differential equation systems		[SW1] Assessment of factual knowledge		
	K7_U03		student can propose a control system and can use a reference manual of the implemented microprocessor system		[SU4] Assessment of ability to use methods and tools [SU1] Assessment of task fulfilment		
Subject contents	State equations, PID regulators, cascade control, poles placement, numerical methods for differential equations, control systems implementation on a microcontroller, usage of DSP instructions/functions						
Prerequisites and co-requisites	Essentials of automatic control and electrical engineering, ability to write simple code in C language.						
Assessment methods and criteria	Subject passing criteria		Passing threshold		Percentage of the final grade		
	Lectures		60.0%		50.0%		
	Laboratories		60.0%		50.0%
