

Subject card

Subject name and code	Computer-aided design, PG_00061990						
Field of study	Management and Production Engineering						
Date of commencement of studies	October 2023		Academic year of realisation of subject			2024/2025	
Education level	first-cycle studies		Subject group			Obligatory subject group in the field of study Subject group related to scientific research in the field of study	
Mode of study	Full-time studies		Mode of delivery			at the university	
Year of study	2		Language of instruction			Polish Polish	
Semester of study	4		ECTS credits			5.0	
Learning profile	general academic profile		Assessment form			assessment	
Conducting unit	Zakład Technologii Maszyn i Automatyzacji Produkcji -> Institute of Manufacturing and Materials Technology -> Faculty of Mechanical Engineering and Ship Technology						
Name and surname of lecturer (lecturers)	Subject supervisor		dr inż. Piotr Sender				
	Teachers						
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	30.0	0.0	0.0	30.0	0.0	60
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	60		5.0		60.0	125
Subject objectives	Acquiring knowledge and skills in designing using CAD systems.						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[K6_W03] has knowledge of the design record (the record structure)for the preparation of the manufacturing process documentation and basic knowledge of the implementation and management of production systems, including the principles of designing machine parts and manufacturing technologies using information techniques	The student acquires knowledge in the field of creating technical documentation.	[SW3] Assessment of knowledge contained in written work and projects
	[K6_K01] feels the need for self-realization by learning throughout life, is looking for modern and innovative solutions in their actions, is able to think creatively and act in an entrepreneurial way	The student acquires basic skills in using the CAD system, enabling further self-education.	[SK2] Assessment of progress of work
	[K6_W09] knows the general principles of creating and developing forms of individual entrepreneurship and stimulating employee creativity, using knowledge in the field of design, production and operation of machinery and technical devices	The knowledge acquired by the student allows the student to visualize, using CAD software, for creating of drawing documentation of various technical elements that the student may have into contact with in his professional life.	[SW3] Assessment of knowledge contained in written work and projects
	[K6_W07] has knowledge of methods, errors and measurement uncertainty, product geometry specifications and assessment of their accuracy	The student acquires the ability to create and read technical documentation containing markings of shape deviations, dimensional tolerances, notation of fits and markings of roughness profile parameters.	[SW3] Assessment of knowledge contained in written work and projects
	[K6_U04] is able to develop documentation in the area of preparation, implementation and control of production processes in Polish and in a foreign language considered basic for scientific fields, is able to identify and formulate the basic objectives of quality management in the product life cycle, is able to use information and communication techniques appropriate to the implementation of tasks typical in engineering activities including preparation, production and supervision of the manufacturing process	The student is able to create documentation in the area of preparation, implementation and control of production processes in the metric and imperial notation systems.	[SU3] Assessment of ability to use knowledge gained from the subject [SU4] Assessment of ability to use methods and tools [SU1] Assessment of task fulfilment
Subject contents	Familiarization with 3D CAD software (e.g. Inventor) in the field of creating 2D and 3D technical documentation.		
Prerequisites and co-requisites			
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	assessment of project implementation	60.0%	80.0%
	attendance at classes	80.0%	20.0%
Recommended reading	Basic literature	Andrzej Jaskólski, Autodesk Inventor Professional 2024 PL / 2024+ / Fusion 360. Effective design methodology. Helion Publishing House.	
		Andrzej Jaskólski, AutoCAD 2021 PL/EN/LT. Methodology for effective parametric and non-parametric 2D and 3D design. Helion Publishing House.	
	Supplementary literature	Tutorials of any CAD systems (e.g. Inventor, AutoCAD)	
	eResources addresses	Uzupełniające Adresy na platformie eNauczanie:	
Example issues/ example questions/ tasks being completed	Draw an assembly containing elements created in sheet metal, surface module, etc.		

Work placement	Not applicable
