GDAŃSK UNIVERSITY OF TECHNOLOGY

Subject card

Subject name and code	Optical spectroscopy in medicine, PG_00053364		
Field of study	Biomedical Engineering, Biomedical Engineering, Biomedical Engineering		
Date of commencement of studies	February 2024	Academic year of realisation of subject	2024/2025
Education level	second-cycle studies	Subject group	Optional subject group Subject group related to scientific research in the field of study
Mode of study	Full-time studies	Mode of delivery	at the university
Year of study	1	Language of instruction	Polish
Semester of study	2	ECTS credits	2.0
Learning profile	general academic profile	Assessment form	assessment
Conducting unit	Division of Complex Systems Spectroscopy -> Institute of Physics and Applied Computer Science -> Faculty of Applied Physics and Mathematics		
Name and surname of lecturer (lecturers)	Subject supervisor	dr hab. Tomasz Wąsowicz	
	Teachers	dr hab. Tomasz Wąsowicz	

Lesson types and methods of instruction

Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
Number of study hours	15.0	0.0	0.0	15.0	0.0	30

E-learning hours included: 0.0

Learning activity and number of study hours

Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours	Self-study	SUM
Number of study hours	30	2.0	18.0	50

Subject objectives

The main goal is introduction to the theoretical bases of optical spectroscopy (IR, VIS, UV, Raman) and its applications in biology and medicine.

Learning outcomes

Course outcome	Subject outcome	Method of verification
[K7_U02] can perform tasks related to the field of study as well as formulate and solve problems applying recent knowledge of physics and other areas of science	Student can perform an experiment, show results and formulate the conclusions, can answer the questions	[SU1] Assessment of task fulfilment [SU5] Assessment of ability to present the results of task
[K7_W06] Knows and understands, to an increased extent, the basic processes taking place in the life cycle of devices, facilities and technical systems.	Student can perform an experiment using proper devices and tools.	[SW1] Assessment of factual knowledge [SW2] Assessment of knowledge contained in presentation
[K7_K01] is ready to create and develop models of proper behaviour in the work and life environment; undertake initiatives; critically evaluate actions of their own, teams and organisations they are part of; lead a group and take responsibility for its actions; responsibly perform professional roles taking into account changing social needs, including: - developing the achievements of the profession, - observing and developing rules of professional ethics and acting to comply to these rules	Student can analyze the problem and its future biophysical application	[SK2] Assessment of progress of work

Subject contents	1. Introduction to "The optical spectroscopy" 2. The Bohr model of the atom. Emission and the absorption of the radiation 3. Hydrogen energies and spectrum vs. excitation spectrum of a multielectron atom 4. Stark effect. Zeeman effect. 5. Chemical bonding theory 6. Ultraviolet-visible spectroscopy 7. Vibrational and rotational spectroscopy 8. The Raman spectroscopy 9. Spectral instruments 10. Physical concepts and practical aspects of lasers 11. The optical proprieties of tissues 12. the physical concepts of spectroscopic methods and techniques applied to biophysics and medicine 12a. Photodynamic diagnostic of cancer and cancer therapy 12b. Spectral optical coherence tomography 12c. Medical applications of holography. MRI of the lungs using hyperpolarized noble gases. 12d. Fluorescence methods for molecular biology 12e. Other spectroscopic methods		
Prerequisites and co-requisites	Student should know the fundamental concepts in Physics i.e. 1. Dynamics of circular motion 2. Simple harmonic motion 3. The wave motion 4. Electricity and magnetism 5. Black body radiation		
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	Written exam	50.0%	70.0%
	Project	50.0%	30.0%
