

## Subject card

Subject name and code	Computational basics of artificial intelligence, PG_00053332						
Field of study	Biomedical Engineering, Biomedical Engineering, Biomedical Engineering						
Date of commencement of studies	February 2024		Academic year of realisation of subject		2023/2024		
Education level	second-cycle studies		Subject group		Obligatory subject group in the field of study Subject group related to scientific research in the field of study		
Mode of study	Full-time studies		Mode of delivery		at the university		
Year of study	1		Language of instruction		Polish		
Semester of study	1		ECTS credits		3.0		
Learning profile	general academic profile		Assessment form		assessment		
Conducting unit	Department of Biomedical Engineering -> Faculty of Electronics, Telecommunications and Informatics						
Name and surname of lecturer (lecturers)	Subject supervisor		dr inż. Artur Poliński				
	Teachers		dr inż. Artur Poliński				
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	0.0	0.0	15.0	0.0	30
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours	Self-study	SUM		
	Number of study hours	30	3.0	42.0	75		
Subject objectives	The aim of the course is introduction the computational foundations of artificial intelligence						
Learning outcomes	Course outcome	Subject outcome			Method of verification		
	[K7_U01] can apply mathematical knowledge to formulate and solve complex and non-typical problems related to the field of study by:n-appropriate selection of source information and its critical analysis, synthesis, creative interpretation and presentation,n-application of appropriate methods and toolsn	has a basic knowledge of data analysis			[SU1] Assessment of task fulfilment		
	[K7_W01] Knows and understands, to an increased extent, mathematics to the extent necessary to formulate and solve complex issues related to the field of study.	has a basic knowledge of optimization methods			[SW1] Assessment of factual knowledge		
	[K7_W03] Knows and understands, to an increased extent, the construction and operating principles of components and systems related to the field of study, including theories, methods and complex relationships between them and selected specific issues - appropriate for the curriculum.	has a basic knowledge of computing fundamentals of artificial intelligence			[SW1] Assessment of factual knowledge		
[K7_K02] is ready to provide critical evaluation of received content and to acknowledge the importance of knowledge in solving cognitive and practical problems	has a basic knowledge of computing fundamentals of artificial intelligence			[SK5] Assessment of ability to solve problems that arise in practice			

Subject contents	<p>1. Elements of linear algebra and analytical geometry (norms, bilinear mappings, length and distance of vectors, angle between vectors, basis of linear space, orthogonal projection, rotations)</p> <p>2 Matrix decomposition, vectors and eigenvalues, SVD decomposition</p> <p>3 Elements of mathematical analysis (differentiation, Jakobi matrix, Hesse matrix, introduction to gradient methods, Newton's method for equations and systems of nonlinear equations)</p> <p>4 Selected elements of the probability theory (random variable, moments, distributions, Bayes' theorem)</p> <p>5 Optimization methods in artificial intelligence (optimization, optimization with constraints, linear programming)</p> <p>6 Modeling (cost functions, parameter estimation)</p> <p>7 Data analysis using linear regression</p> <p>8 Methods for reducing the dimension of data - principal component analysis</p> <p>9 Methods of heuristic solution search (including simulated annealing)</p>											
Prerequisites and co-requisites	Knowledge of mathematics at the level of engineering studies											
Assessment methods and criteria	<table border="1" data-bbox="451 624 1487 725"> <thead> <tr> <th data-bbox="451 624 794 658">Subject passing criteria</th> <th data-bbox="794 624 1137 658">Passing threshold</th> <th data-bbox="1137 624 1487 658">Percentage of the final grade</th> </tr> </thead> <tbody> <tr> <td data-bbox="451 658 794 692">project</td> <td data-bbox="794 658 1137 692">50.0%</td> <td data-bbox="1137 658 1487 692">50.0%</td> </tr> <tr> <td data-bbox="451 692 794 725">lecture</td> <td data-bbox="794 692 1137 725">50.0%</td> <td data-bbox="1137 692 1487 725">50.0%</td> </tr> </tbody> </table>			Subject passing criteria	Passing threshold	Percentage of the final grade	project	50.0%	50.0%	lecture	50.0%	50.0%
Subject passing criteria	Passing threshold	Percentage of the final grade										
project	50.0%	50.0%										
lecture	50.0%	50.0%
