

Subject card

| Subject name and code | Fluid flow machinery design, PG_00059384 | | | | | | | | |
|---|---|-----------------------------------|--|-------------------------------------|--------|---|---------|-----|--|
| Field of study | Mechanical Engineering | | | | | | | | |
| Date of commencement of studies | February 2024 | | Academic year of realisation of subject | | | 2024/2025 | | | |
| Education level | second-cycle studies | | Subject group | | | Optional subject group Subject group related to scientific research in the field of study | | | |
| Mode of study | Part-time studies | | Mode of delivery | | | at the university | | | |
| Year of study | 1 | | Language of instruction | | | Polish | | | |
| Semester of study | 2 | | ECTS credits | | | 5.0 | | | |
| Learning profile | general academic profile | | Assessment form | | | assessment | | | |
| Conducting unit | Zakład Maszyn Przepływowych -> Institute of Energy -> Faculty of Mechanical Engineering and Ship Technology | | | | | | nd Ship | | |
| Name and surname | | | dr inż. Wojciech Włodarski | | | | | | |
| of lecturer (lecturers) | Teachers | | dr inż. Wojciech Włodarski | | | | | | |
| Lesson types and methods of instruction | Lesson type | Lecture | Tutorial | Laboratory | Projec | t | Seminar | SUM | |

| Learning activity and number of study hours | Learning activity | Participation i classes including | | Participation in consultation hours | | Self-st | udy | SUM | |
| | Number of study hours | 36 | | 12.0 | | 77.0 | | 125 | |
| Subject objectives | The aim of the course is to broaden the knowledge in the field of design, construction, operation and control of turbomachinery used in the power industry. | | | | | | | | |
| Learning outcomes | Course outcome | | Subject outcome | | | Method of verification | | | |
| | [K7_U06] when solving engineering problems on design, technology and operation of machines is able to assess and classify typical methods and tools, define systemic and ex-technical aspects using modern calculating methods and design tools or modifying the current ones | | The student assesses the usefulness and correctly selects the methods and tools best suited to solving engineering tasks typical for the specialization. | | | [SU3] Assessment of ability to use knowledge gained from the subject | | | |
| | [K7_W05] possesses profound knowledge on the operation of complex systems and mechanical devices, including process equipment | | The student assesses the usefulness and correctly selects the methods and tools best suited to solving engineering tasks typical for the specialization. | | | [SW1] Assessment of factual knowledge | | | |
| | [K7_U07] is able to perform a preliminary economic analysis of the undertaken engineering actions within the range of design, production and operation of machines and technical devices | | The student has in-depth knowledge of the operation of complex mechanical systems and devices, including process apparatus. | | | [SU1] Assessment of task fulfilment | | | |
| | [K7_W03] possesses a profound knowledge on thermodynamic processes and their simulation, knows simulation methods and programs aiding the design and operation of power generating machines and process equipment, including renewable energy sources, air conditioning and cooling | | The student is able to describe and evaluate system and non-technical aspects when solving engineering tasks in the field of design, technology and operation of machines. | | | [SW1] Assessment of factual knowledge | | | |

| Subject contents | Classification of turbomachinery devices. Steam turbines, gas turbines, wind turbines, pumps, compressors and fans. The principle of work, construction, design solutions, operation and control of selected types of turbomachinery devices. Strength analysis of rotors. Fundamentals of rotor dynamics. Design of steering and rotor blades and their mountings. Vibration of the blades. Design of journal and thrust bearings. Turbine housings and external glands. The use of numerical methods in the design of turbomachinery devices. | | | | | | | |
