

Subject card

Subject name and code	Modelling in machine design, PG_00057368									
Field of study	Mechanical Engineering									
Date of commencement of studies	February 2024	Academic year of realisation of subject		2023/2024						
Education level	second-cycle studies	Subject group		Obligatory subject group in the field of study Subject group related to scientific research in the field of study						
Mode of study	Full-time studies	Mode of delivery		at the university						
Year of study	1	Language of instruction		Polish						
Semester of study	1	ECTS credits		4.0						
Learning profile	general academic profile	Assessment form		assessment						
Conducting unit	Zakład Materiałoznawstwa i Technologii Materiałowych -> Institute of Manufacturing and Materials Technology -> Faculty of Mechanical Engineering and Ship Technology									
Name and surname of lecturer (lecturers)	Subject supervisor		dr inż. Michał Landowski							
	Teachers		dr inż. Michał Landowski dr inż. Krzysztof Krzysztofowicz dr inż. Artur Sitko dr inż. Gabriel Strugała mgr inż. Krzysztof Emilianowicz							
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM			
	Number of study hours	30.0	0.0	15.0	0.0	0.0	45			
E-learning hours included: 0.0										
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM			
	Number of study hours	45		8.0		47.0	100			
Subject objectives	Obtaining the basic knowledge on the advanced construction materials and its behavior in various environments									
Learning outcomes	Course outcome		Subject outcome			Method of verification				
	[K7_W04] possesses specialized knowledge on design, construction, properties and testing methods of construction materials		has specialist knowledge			[SW3] Assessment of knowledge contained in written work and projects				
	[K7_U08] is able to design a procedural equipment or device compliant with the specifications using a design aid system in the form of a design documentation, selecting the appropriate model, performing critical analysis with the proper selection of tools and technologies		able to do critical analysis			[SU3] Assessment of ability to use knowledge gained from the subject				
	[K7_U06] when solving engineering problems on design, technology and operation of machines is able to assess and classify typical methods and tools, define systemic and ex-technical aspects using modern calculating methods and design tools or modifying the current ones		able to evaluate and classify			[SU2] Assessment of ability to analyse information				

Subject contents	<p>LECTURE: Rules and criteria for metallic materials selection. Weldable increased and high strength steels. Maraging steels. Steels for automotive body sheets. Corrosion resistant and acid resistant steels: austenitic and duplex type ferritic-austenitic, corrosion resistant superalloys. Steels for elevated temperatures application.</p> <p>Heat resistant and high-temperature creep resistant steels. High-temperature creep resistant iron, nickel and cobalt superalloys for power generation turbines, aviation turbines, petrochemical and chemical industry.</p> <p>Refractory metals and alloys: molybdenum, niobium, rhenium, tantalum, zirconium and hafnium.</p> <p>Superplastic materials. MEMS and materials used in it. Materials for nuclear power generation. High entropy materials and alloys (HEM).</p> <p>LABORATORY: Weldable increased and high strength steels. High alloying corrosion resistant steels. Materials for high temperature applications. Composites</p>												
Prerequisites and co-requisites													
Assessment methods and criteria	<table border="1"> <thead> <tr> <th data-bbox="446 417 787 451">Subject passing criteria</th><th data-bbox="787 417 1129 451">Passing threshold</th><th data-bbox="1129 417 1486 451">Percentage of the final grade</th></tr> </thead> <tbody> <tr> <td data-bbox="446 451 787 485">laboratory</td><td data-bbox="787 451 1129 485">50.0%</td><td data-bbox="1129 451 1486 485">30.0%</td></tr> <tr> <td data-bbox="446 485 787 518">essay</td><td data-bbox="787 485 1129 518">50.0%</td><td data-bbox="1129 485 1486 518">35.0%</td></tr> <tr> <td data-bbox="446 518 787 552">exam</td><td data-bbox="787 518 1129 552">50.0%</td><td data-bbox="1129 518 1486 552">35.0%</td></tr> </tbody> </table>	Subject passing criteria	Passing threshold	Percentage of the final grade	laboratory	50.0%	30.0%	essay	50.0%	35.0%	exam	50.0%	35.0%
Subject passing criteria	Passing threshold	Percentage of the final grade											
laboratory	50.0%	30.0%											
essay	50.0%	35.0%											
exam	50.0%	35.0%
