

## Subject card

Subject name and code	Projects and teams management, PG_00057035						
Field of study	Mechatronics						
Date of commencement of studies	February 2024	Academic year of realisation of subject			2024/2025		
Education level	second-cycle studies	Subject group			Humanistic-social subject group		
Mode of study	Full-time studies	Mode of delivery			at the university		
Year of study	1	Language of instruction			Polish		
Semester of study	2	ECTS credits			2.0		
Learning profile	general academic profile	Assessment form			assessment		
Conducting unit	Institute of Energy -> Faculty of Mechanical Engineering and Ship Technology						
Name and surname of lecturer (lecturers)	Subject supervisor	dr inż. Marzena Banaszek					
	Teachers						
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	0.0	0.0	0.0	15.0	0.0	15
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours		Self-study		SUM
	Number of study hours	15	11.0		24.0		50
Subject objectives	The course aims to: understand the nature and types of projects; developing the ability to manage individual stages of the project, i.e. from project initiation, through planning and execution, to project control and evaluation, developing the ability to coordinate work in the project team, project budgeting and risk management.						
Learning outcomes	Course outcome	Subject outcome			Method of verification		
	[K7_K01] understands the need for learning during the whole life; can inspire and organise process of mechatronic education and self-education	The student understands the need for lifelong learning; is able to inspire and organize the process of education and mechatronic self-education of oneself and others.			[SK5] Assessment of ability to solve problems that arise in practice [SK3] Assessment of ability to organize work [SK1] Assessment of group work skills		
	[K7_K81] is able to cooperate in international team at her/his own university, during work placement and during study abroad	The student is able to cooperate in an international team at their own university and during internships and studies abroad.			[SK5] Assessment of ability to solve problems that arise in practice [SK1] Assessment of group work skills		
	[K7_W09] knows general rules of individual and team work organisation as well as enterprise management that utilise knowledge in the area of technical sciences and science disciplines appropriate for mechatronics	The student knows the general principles of organizing individual and team work and running a business using knowledge in the field of technical sciences and scientific disciplines relevant to mechatronics.			[SW3] Assessment of knowledge contained in written work and projects		
	[K7_W71] has general knowledge in humanistic, social, economic or legal sciences, including their fundamentals and applications	The student has general knowledge in the field of humanities, social sciences, economics or law, including their basics and applications.			[SW3] Assessment of knowledge contained in written work and projects		
Subject contents	Development of the project concept (idea and purpose of the project, nature of the project, time frame). Risk identification and risk management in projects (analysis of opportunities and threats for the project). Creating a project team. Delegation of tasks in the project (identification of tasks in the project, division of duties, powers and competences of project employees). Communication in the project team (principles and styles of managing, motivating and inspiring project employees, conflicts in project teams, conflict response techniques). Project documentation. Project implementation schedule. Creating the project budget and determining the sources of its financing (determining the direct and indirect costs of the project, internal and external sources of project financing). Monitoring and control of project implementation.						
Prerequisites and co-requisites							

Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
		Development of the project card and execution of the project	50.0%
