

Subject card

Subject name and code	Yacht Construction in Practice 4, PG_00062025						
Field of study	Design and Construction of Yachts						
Date of commencement of studies	October 2021	Academic year of realisation of subject			2023/2024		
Education level	first-cycle studies	Subject group					
Mode of study	Full-time studies	Mode of delivery			at the university		
Year of study	3	Language of instruction			Polish		
Semester of study	6	ECTS credits			10.0		
Learning profile	practical profile	Assessment form			assessment		
Conducting unit	Institute of Ocean Engineering and Ship Technology -> Faculty of Mechanical Engineering and Ship Technology						
Name and surname of lecturer (lecturers)	Subject supervisor		mgr inż. Jacek Frost				
	Teachers						
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	0.0	60.0	0.0	0.0	0.0	60
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	60		0.0		0.0	60
Subject objectives	The aim of the course is to familiarize students with the functioning of the enterprise. Getting to know the structure of the company. Getting to know the production process of watercrafts. Participation in all stages of yacht construction.						
Learning outcomes	Course outcome	Subject outcome			Method of verification		
	K6_K02	During practical classes, the student solves current problems under the supervision of a tutor.			[SK5] Assessment of ability to solve problems that arise in practice [SK3] Assessment of ability to organize work [SK1] Assessment of group work skills		
	K6_U06	The student solves assigned engineering problems during classes			[SU4] Assessment of ability to use methods and tools [SU1] Assessment of task fulfilment		
	K6_K01	The student is receiving increasingly advanced tasks related to the design and manufacturing of watercraft, thereby understanding the necessity for further development			[SK5] Assessment of ability to solve problems that arise in practice [SK2] Assessment of progress of work		
	K6_K03	The student is familiarizing themselves with various methods of yacht manufacturing and is acquainted with materials used in producing yachts made from synthetic compounds. They are capable of selecting composite manufacturing technologies. They are aware of the strengths and weaknesses of yacht manufacturing technologies and their impact on the environment. This knowledge is validated based on a report from completed practical training.			[SK5] Assessment of ability to solve problems that arise in practice [SK4] Assessment of communication skills, including language correctness		
Subject contents	Implementation of the internship in an enterprise in the amount of 240 hours, settlement of the internship, preparation of a report.						

Prerequisites and co-requisites	Completed 5th semester of studies		
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	Practice implementation report	60.0%	100.0%
Recommended reading	Basic literature	not applicable	
	Supplementary literature	not applicable	
	eResources addresses	Adresy na platformie eNauczanie:	
Example issues/ example questions/ tasks being completed	not applicable		
Work placement	Not applicable
