

## 表 GDAŃSK UNIVERSITY OF TECHNOLOGY

## Subject card

Subject name and code	Yacht Construction in Practice 4, PG_00062025									
Field of study	Design and Construction of Yachts									
Date of commencement of studies	October 2021		Academic year of realisation of subject			2023/2024				
Education level	first-cycle studies		Subject group							
Mode of study	Full-time studies		Mode of delivery			at the university				
Year of study	3		Language of instruction			Polish				
Semester of study	6		ECTS credits			10.0				
Learning profile	practical profile		Assessment form			assessment				
Conducting unit	Institute of Ocean Engineering and Ship Technology -> Faculty of Mechanical Engineering and Ship Technology						Ship			
Name and surname of lecturer (lecturers)	Subject supervisor		mgr inż. Jacek Frost							
	Teachers									
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory Project		t	Seminar	SUM		
	Number of study hours	0.0	60.0	0.0	0.0		0.0	60		
	E-learning hours included: 0.0									
Learning activity and number of study hours	Learning activity	Participation in classes includ plan	n didactic led in study	Participation in consultation hours		Self-study		SUM		
	Number of study hours	60		0.0		0.0		60		
Subject objectives	The aim of the course is to familiarize students with the functioning of the enterprise. Getting to know the structure of the company. Getting to know the production process of watercrafts. Participation in all stages of yacht construction.									
Learning outcomes	Course outcome Subject outcome Method of verification					ication				
	K6_K02		During practical classes, the student solves current problems under the supervision of a tutor.			[SK5] Assessment of ability to solve problems that arise in practice [SK3] Assessment of ability to organize work [SK1] Assessment of group work skills				
	K6_U06		The student solves assigned engineering problems during classes			[SU4] Assessment of ability to use methods and tools [SU1] Assessment of task fulfilment				
	K6_K01		The student is receiving increasingly advanced tasks related to the design and manufacturing of watercraft, thereby understanding the necessity for further development			[SK5] Assessment of ability to solve problems that arise in practice [SK2] Assessment of progress of work				
	K6_K03		The student is familiarizing themselves with various methods of yacht manufacturing and is acquainted with materials used in producing yachts made from synthetic compounds. They are capable of selecting composite manufacturing technologies. They are aware of the strengths and weaknesses of yacht manufacturing technologies and their impact on the environment. This knowledge is validated based on a report from completed practical training.			[SK5] Assessment of ability to solve problems that arise in practice [SK4] Assessment of communication skills, including language correctness				
Subject contents	preparation of a report.									

Prerequisites and co-requisites	Completed 5th semester of studies					
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade			
Recommended reading	Basic literature	not applicable				
3	Supplementary literature	not applicable				
	eResources addresses	Adresy na platformie eNauczanie:				
Example issues/ example questions/ tasks being completed	not applicable					
Work placement	Not applicable
