

## Subject card

Subject name and code	Monitoring and Measuring-and-Diagnostic Systems, PG_00038118						
Field of study	Automation, Robotics and Control Systems						
Date of commencement of studies	October 2022	Academic year of realisation of subject	2023/2024				
Education level	first-cycle studies	Subject group					
Mode of study	Full-time studies	Mode of delivery	at the university				
Year of study	2	Language of instruction	Polish				
Semester of study	4	ECTS credits	3.0				
Learning profile	general academic profile	Assessment form	assessment				
Conducting unit	Department of Metrology and Information Systems -> Faculty of Electrical and Control Engineering						
Name and surname of lecturer (lecturers)	Subject supervisor	dr inż. Tomasz Ciszewski					
	Teachers	dr hab. inż. Dariusz Świsulski dr inż. Michał Ziółko dr inż. Tomasz Ciszewski dr inż. Ariel Dzwonkowski					
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	30.0	0.0	15.0	0.0	0.0	45
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours	Self-study	SUM		
	Number of study hours	45	4.0	26.0	75		
Subject objectives	Acquiring fundamental knowledge on the theory of diagnostic measurements as well as methods and diagnostic measurement systems used in automatics.						
Learning outcomes	Course outcome	Subject outcome	Method of verification				
	[K6_K02] can work in a group taking on different roles in it	the student is able to work in a group, assuming various roles	[SK1] Assessment of group work skills				
	[K6_W03] has structured knowledge of tools and methods for measuring electrical quantities, documenting their results and assessing errors and uncertainties	the student has structured knowledge of tools and methods for measuring electrical quantities, documenting their results and assessing errors and uncertainties	[SW1] Assessment of factual knowledge				
	[K6_U04] has the ability to self-educate, among other things, in order to improve professional qualifications	the student has the ability to self-educate, among others: in order to improve professional qualifications	[SU3] Assessment of ability to use knowledge gained from the subject				
Subject contents	LECTURE General problems of diagnostics. Diagnostic economy. Vibroacoustic diagnostics. Ultrasonic diagnostics. Thermovision diagnostics. Diagnostics of electrical machines. Diagnostics of electronic modules. Building monitoring. Access control systems, levels of protection. Alarming systems. FTC systems. Sparkproof systems. The structure of diagnostic systems (management of tests, test modules, the measurement procedures). Measuring equipment (DAQ card, PXI standard, measuring instruments with standard interfaces). Measurement software (methods of programming, LabVIEW environment, SCPI language). The use of wireless transmission for remote monitoring (radiomodems, GSM). Examples of measurement and diagnostic systems (diagnostics of control valves and traction motors). LABORATORY EXERCISES Using LabVIEW software for prepare measurement procedures. Cooperation of computers with the measuring equipment. Thermovision diagnostics. Detection of electrical machine faults by vibration and current (MCSA) methods.						
Prerequisites and co-requisites	Basic electric engineering knowledge. Ability to connect electrical and electronic circuits.						
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade				
	Midterm colloquium	60.0%	60.0%				
	Practical exercise	60.0%	40.0%

Example issues/ example questions/ tasks being completed	<ol style="list-style-type: none"> <li>1. Draw and discuss the structure of the test system.</li> <li>2. Structure and working principle of sample-remember system.</li> <li>3. Discuss the purpose of the bus transmission control IEC-625.</li> <li>4. How do you determine the optimal scope of diagnosis in the enterprise.</li> <li>5. The principle of operation of ultrasonic flaw detector analog.</li> <li>6. Please rank the methods of mounting the accelerometers according to increasing frequency range.</li> <li>7. To present and compare the basic configurations of the track analog measurement signals acquisition card .</li> <li>8. What is resolution and ADC range-digital.</li> <li>9. Bath curve-discuss the characteristic points</li> <li>10. Discuss the construction and properties of the accelerometer of type ICP.</li> </ol>	
Work placement	Not applicable
