

Subject card

Subject name and code	, PG_00062071						
Field of study	Civil Engineering						
Date of commencement of studies	October 2022		Academic year of realisation of subject		2023/2024		
Education level	first-cycle studies		Subject group		Obligatory subject group in the field of study		
Mode of study	Full-time studies		Mode of delivery		at the university		
Year of study	2		Language of instruction		Polish Pass 50% - Acad Pass 50% - BIM		
Semester of study	3		ECTS credits		1.0		
Learning profile	general academic profile		Assessment form		assessment		
Conducting unit	Department of Engineering Structures -> Faculty of Civil and Environmental Engineering						
Name and surname of lecturer (lecturers)	Subject supervisor		dr inż. Arkadiusz Sitarski				
	Teachers						
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	0.0	0.0	0.0	0.0	0.0	0
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	0		0.0		0.0	0
Subject objectives	<p>Preparing students to produce technical drawings in the subject of General Construction</p> <p>Learning the basics of Building Information Modeling (BIM) technology which will be useful for students in the future design and implementation practice.</p> <p>Learning the basics of developing a simplified BIM model of building (architecture and construction)</p> <p>Learning to create, modify, and process BIM model data to carry out basic analyses and create schedules, floor plans, visualizations, and animations.</p>						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	[K6_U04] Reads and prepares construction documentation (including drawings, graphic documentation in the CAD environment), efficiently uses maps as well as architectural, construction and geodetic drawings.		Ability to create advanced technical drawings Ability to create simple BIM models		[SU2] Assessment of ability to analyse information [SU4] Assessment of ability to use methods and tools		
	[K6_W04] Knows the rules of descriptive geometry and technical drawing for preparing and reading architectural, construction and geodetic drawings; also with the use of CAD		Creating construction technical drawings in accordance with the guidelines and standards for construction drawings.		[SW3] Assessment of knowledge contained in written work and projects [SW1] Assessment of factual knowledge		

Subject contents	<p>Preparation of selected drawings for the subject General Construction.- composition of drawing elements.- preparing drawings for printing for the adopted scaleSelected advanced elements of the AutoCad program - advanced commands</p> <p>Introduction to BIM, basic BIM terminology, BIM software overview, interoperability of software, BIM standards.</p> <p>Architectural and structural modeling in BIM software (for instance, foundations, walls, columns, slabs).</p> <p>Modeling of families, parameterization of families, use of families in the project.</p> <p>Modeling of the terrain and surroundings of the building.</p> <p>Creating schedules, cost calculations.</p> <p>Graphics display options, creating visualizations and animations, rendering.</p> <p>Creating drawing sheets, arrangement of views and schedules on the drawing sheet.</p>		
Prerequisites and co-requisites	<p>Knowledge of Geometry and principles of technical drawing.</p> <p>Knowledge of the basics of operating systems.</p> <p>Basic knowledge of AutoCad</p>		
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	Drawing exercises	80.0%	50.0%
	Design drawings	60.0%	50.0%
